

Supplementary Information

Gene expression profiles of genes present in the cooperation networks for the seed tissue of Zhongshuang11 (ZS11) and Zhongyou821 (ZY821).

Visualisation of the expression values of transcription factor (TF) orthologous genes. The TFs and their significant cooperation have been presented in the manuscript in Figures 2 and 3. In the figure legends below, gene ID represents the Ensembl ID of the orthologous genes and gene symbols refer to the transcription factor gene names. In the following plots, y-axis represents the gene expression values and x-axis represents the time points 1, 2, 3 and 4 indicating day 7, day 10, day 15 and day 45 after flowering.
