

**Figure S5.** Interaction between increasing amounts of L- or D-Q53 CecB peptides and 100 ng of linearized DNA. Gel images of the first experiment; Amounts of peptides (ng) are reported in white.

**Figure S6.** Interaction between increasing amounts of L- or D-Q53 CecB peptides and 100 ng of linearized DNA. Gel images of the second experiment; Amounts of peptides (ng) are reported in white.

**Figure S7.** Interaction between increasing amounts of L- or D-Q53 CecB peptides and 100 ng of linearized DNA. Gel images of the third experiment; Amounts of peptides (ng) are reported in white.
