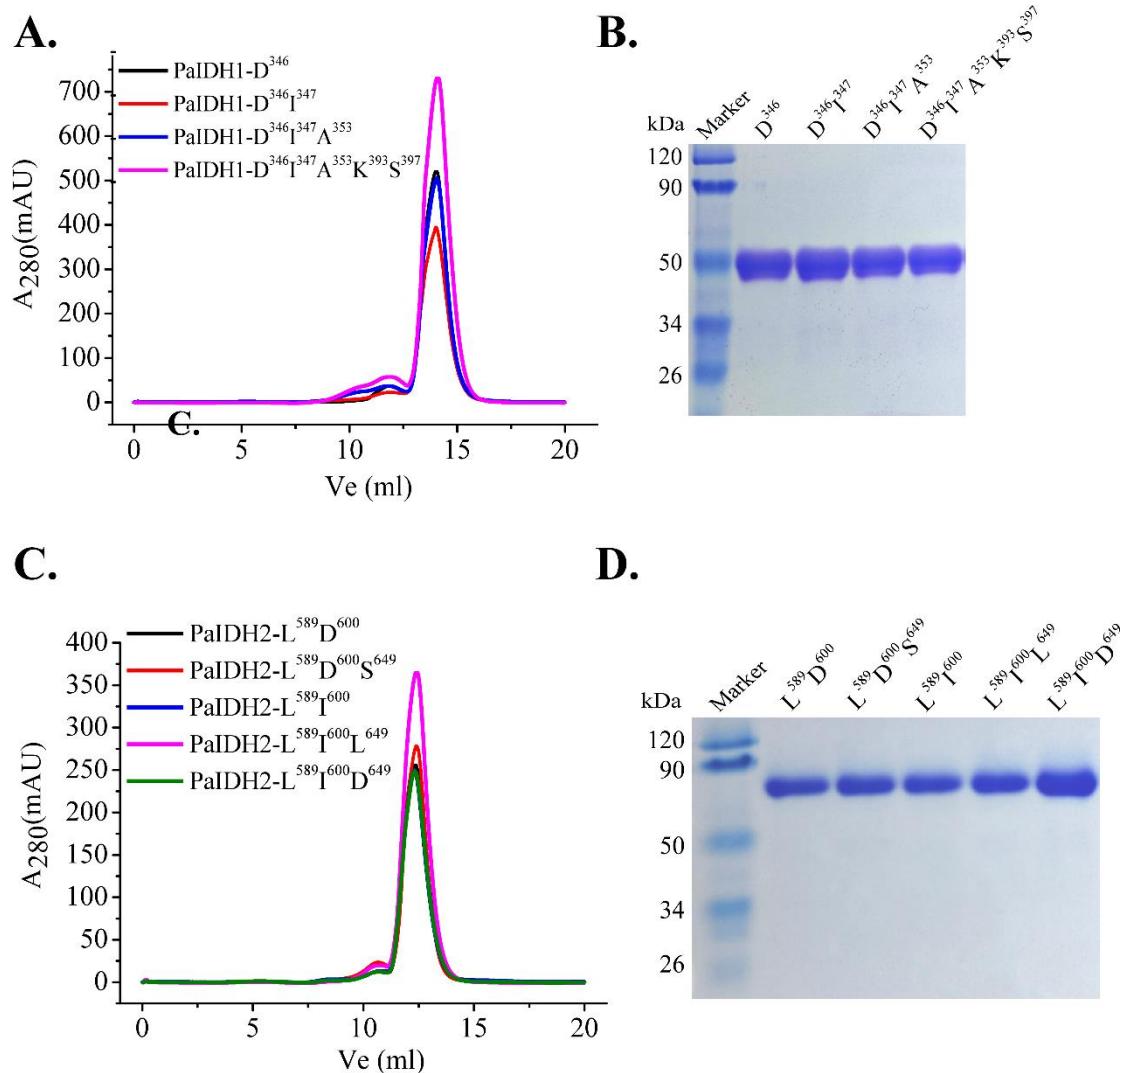

Figure S1. Determination of the molecular mass of PaIDH1 and PaIDH2 mutants. The flow rate was 0.5ml/min and the proteins in the fractions were monitored at 280 nm. (A) Result of gel filtration chromatography of PaIDH1 mutants. (B) SDS-PAGE of PaIDH1 mutants. (C) Result of gel filtration chromatography of PaIDH2 mutants. (D) SDS-PAGE of PaIDH2 mutants.
