A solution of bromine ( $0.3 \mathrm{~mL}, 5.90 \mathrm{mmol}$ ) in $\mathrm{CCl}_{4}(2 \mathrm{~mL})$ was slowly added over a stirred mixture of 3-methyl-butan-2-one (1) ( $505 \mathrm{mg}, 5.90 \mathrm{mmol}$ ) and $\mathrm{AcOH}(0.33 \mathrm{~mL}$ ) at room temperature. After complete addition of bromine it was left reacting for 1 h and then, the reaction was quenched by pouring carefully aqueous $\mathrm{NaHSO}_{3}\left(25 \mathrm{~mL}, 40 \% \mathrm{w} / \mathrm{v}\right.$ ). The organic layer was washed with $40 \% \mathrm{NaHSO}_{3}$ ( 25 mL ), saturated $\mathrm{NaHCO}_{3}(3 \times 25 \mathrm{~mL})$ and brine $(3 \times 25 \mathrm{~mL})$. The organic layer was dried over anhydrous $\mathrm{Na}_{2} \mathrm{SO}_{4}$, and 15 mL of MeOH were added to evaporate the azeotrope under reduced pressure. The residue ( 1.03 g ), which contains mainly 3-bromo-3-methyl-butan-2-one (2), was resolved in benzene ( 20 mL ) and anhydrous $p$ - TsOH ( $171 \mathrm{mg}, 1.00 \mathrm{mmol}$ ) and ethyleneglycol ( $928 \mathrm{mg}, 14.90 \mathrm{mmol}$ ) were added. Then a Dean-Stark trap device was fit and the reaction refluxed for 4.5 h . The crude reaction was worked up by washing with saturated $\mathrm{NaHCO}_{3}(3 \times 25 \mathrm{~mL})$ and brine $(4 \times 25 \mathrm{~mL})$ and the organic layer dried over anhydrous $\mathrm{Na}_{2} \mathrm{SO}_{4}$, after that, $\mathrm{MeOH}(15 \mathrm{~mL})$ was added to evaporate the azeotrope under reduced pressure. The residue ( 811 mg ) was purified by reduced pressure distillation ( $0.15 \mathrm{mmHg}, 32^{\circ} \mathrm{C}$ ) to yield the title compound 3 ( $770 \mathrm{mg}, 3.70$ $\mathrm{mmol}, 62 \%$ from 1) as a colorless liquid.

IR (neat, $\mathrm{n}, \mathrm{cm}^{-1}$ ): 1161, 1093, 1045, 951 (C-O-C), 649 (C-Br).
${ }^{1} \mathrm{H}$ NMR ( $300 \mathrm{MHz}, \mathrm{CDCl}_{3}, \mathrm{~d}, \mathrm{ppm}$ ): 1.52 (3H, s, Me-2), 1.79 ( $6 \mathrm{H}, \mathrm{s}, 2 \mathrm{Me}-1$ '), 4.05 ( $4 \mathrm{H}, \mathrm{br} s, \mathrm{H}-4, \mathrm{H}-5$ ).
${ }^{13} \mathrm{C}$ NMR ( $75 \mathrm{MHz}, \mathrm{CDCl}_{3}, \mathrm{~d}, \mathrm{ppm}$ ): 20.52 (Me-2), 29.51 (C-2’, Me-1’), 65.93 (C-4, C-5), 69.99 (C-1’), 111.92 (C-2).

MS (70 eV, m/z): 195 ([M+2] $\left.{ }^{+}-\mathrm{Me}, 1 \%\right), 193\left(\mathrm{M}^{+}-\mathrm{Me}, 2\right), 129\left(\mathrm{M}^{+}-\mathrm{Br}, 5\right), 153\left(\mathrm{C}_{3} \mathrm{H}_{6}{ }^{81} \mathrm{Br}^{+}, 1\right), 121$
$\left(\mathrm{C}_{3} \mathrm{H}_{6}{ }^{79} \mathrm{Br}^{+}, 1\right), 114\left(\mathrm{M}^{+}-\mathrm{Br}-\mathrm{Me}, 6\right), 99\left(\mathrm{M}^{+}-\mathrm{Br}-2 \mathrm{Me}, 5\right), 87\left(\mathrm{C}_{4} \mathrm{H}_{7} \mathrm{O}_{2}{ }^{+}, 98\right), 69$ (9), 57 (22), 43 (100).
