## Supplementary Materials: Risk Factors and Spatial Clusters of Cryptosporidium Infection among School-Age Children in a Rural Region of Eastern China

Hao Zheng, Jianfeng He, Li Wang, Rong Zhang, Zhen Ding and Wenbiao Hu

**Table S1.** Details of questionnaire in the study.

| Variables   | Options                             |
|---|-------------------------------------|
| Demographic variables                               |                                     |
| Name  |                                     |
| Gender  | 1. Male<br>2.Female                 |
| Age   |                                     |
| Address   |                                     |
| Environmental variables                             |                                     |
| Supplied with piped water                           | <ol> <li>Yes</li> <li>No</li> </ol> |
| Presence of toilets at household                    | 1. Yes<br>2. No                     |
| Raising livestock or poultry                        | 1. Yes<br>2. No                     |
| Personal characteristics                            |                                     |
| Contact with pets (e.g., dog, cat)                  | <ol> <li>Yes</li> <li>No</li> </ol> |
| Boiling water before drinking                       | 1. Yes<br>2. No                     |
| Swimming in one month                               | 1. Yes<br>2. No                     |
| Travelling in six months                            | 1. Yes<br>2. No                     |
| Contact with water facilities in one month          | 1. Yes<br>2. No                     |
| Contact with a person with diarrhea in three months | 1. Yes<br>2. No                     |
| Washing hands before eating and after defecation    | 1. Yes<br>2. No                     |
| Symtoms (e.g., diarrhea, nausea)                    | 1. Yes<br>2. No                     |
