† Kunyu Zhao and Huizhu Yu contributed equally to this work.

**Figure S1.** The topography image (a,d) of BFMO films with the deposition oxygen pressure 2 Pa and 10 Pa respectively, the corresponding out-of-plane PFM image (b,e) and the in-plane image (c,f).

**Figure S2.** The I-V curves (c, f) of BFMO films deposited at  $P_{O_2} = 2$  Pa. The insert shows the position of point A, B, C, and D.

**Figure S3.** The topography image (a) of BFMO film with the deposition oxygen pressure  $P_{O_2} = 2$  Pa. The corresponding in-plane piezoresponse phase image (b-h) after depolarized with +11 V voltage with the tip earthed at different times.

**Table S1.** The average size of all backswitched domains in the poled area in Figure 4.

Time (sec)	Average Domain Size (nm)
1080	3.2
1560	27.1
1980	59.5
2340	72.9
2760	82.0
3180	90.1
3600	93.2
4200	96.2
4600	96.6
5000	96.8
