

Supplementary Table 1. The Primer pairs of key flowering-related genes

| Name        | Forward primers       | Reverse primers        |
|-------------|-----------------------|------------------------|
| <i>TUB</i>  | TGACATTGAGGCCAACTTACA | ATCCACATTAGCAGACCATCGA |
| <i>CO</i>   | GCACTTGAAGTTGGATTGGT  | GTTGGTCCGTTGATTGTCG    |
| <i>FT</i>   | CGTATGCCACCACCTCAGA   | CGTGATGGTGGACCCTGAT    |
| <i>SOCI</i> | TCCTGCTCCCTCAACTCCA   | GCAACTGGAGAAGAGCCTGA   |
| <i>FLC</i>  | CCTACCCTCGTCGCTCAA    | CCTTCCATCTGCTCATCCGT   |

Supplementary Table 2. Summary of RNA-Seq libraries for five biological replicates of the shoot buds at different growth stages of *Pleioblastus pygmaeus*

| Sample | Raw Reads | Clean Reads | Clean Bases(G) | GC Content(%) | Q20(%) | Q30(%) |
|--------|-----------|-------------|----------------|---------------|--------|--------|
| FE     | 58451642  | 54594345    | 8.19           | 51.84         | 95.91  | 90.16  |
| FM     | 71934308  | 67682112    | 10.15          | 52.34         | 97.20  | 92.80  |
| FL     | 61003625  | 56959102    | 8.54           | 50.40         | 95.93  | 90.12  |
| NE     | 56978490  | 52944336    | 7.94           | 52.10         | 96.01  | 90.24  |
| NM     | 63210037  | 59747064    | 8.96           | 51.64         | 95.95  | 90.11  |
| NL     | 60205278  | 56415252    | 8.46           | 51.11         | 95.93  | 90.17  |

Note: Q20/30: The percentage of the bases with phred values greater than 20/30 accounted for the total bases, Qphred = - 10 log<sub>10</sub> (e).

Supplementary Table 3. Function annotation of the transcriptomes of the shoot buds at different growth stages of *Pleioblastus pygmaeus* in different databases

| Database                   | Annotated number | Percentage (%) |
|----------------------------|------------------|----------------|
| Annotated in NR            | 201547           | 55.24          |
| Annotated in NT            | 199699           | 54.73          |
| Annotated in KO            | 76768            | 21.04          |
| Annotated in SwissProt     | 144866           | 39.70          |
| Annotated in PFAM          | 147740           | 40.49          |
| Annotated in GO            | 154573           | 42.36          |
| Annotated in KOG           | 54875            | 15.04          |
| Annotated in all Databases | 30935            | 8.47           |
| Total unigene              | 364840           | 100.00         |

Supplementary Table 4. Differential expressed unigenes based on KEGG function annotation in transcriptome comparison of FE (dormant shoot bud of flowering plant) vs NE (dormant shoot bud of vegetative plant)

| Pathway-term   | Classification                       | Gene number |
|--|--------------------------------------|-------------|
| Plant hormone signal transduction                      | Environmental Information Processing | 511         |
| Spliceosome  | Genetic Information Processing       | 539         |
| Protein processing in endoplasmic reticulum            | Genetic Information Processing       | 502         |
| RNA transport  | Genetic Information Processing       | 436         |
| mRNA surveillance pathway                              | Genetic Information Processing       | 358         |
| DNA replication  | Genetic Information Processing       | 210         |
| Nucleotide excision repair                             | Genetic Information Processing       | 204         |
| Homologous recombination                               | Genetic Information Processing       | 187         |
| Mismatch repair  | Genetic Information Processing       | 155         |
| SNARE interactions in vesicular transport              | Genetic Information Processing       | 84          |
| Starch and sucrose metabolism                          | Metabolism                           | 424         |
| Purine metabolism                                      | Metabolism                           | 385         |
| Amino sugar and nucleotide sugar metabolism            | Metabolism                           | 325         |
| Fatty acid degradation                                 | Metabolism                           | 166         |
| Fatty acid biosynthesis                                | Metabolism                           | 122         |
| Nitrogen metabolism                                    | Metabolism                           | 77          |
| Tropane, piperidine and pyridine alkaloid biosynthesis | Metabolism                           | 55          |
| Photosynthesis - antenna proteins                      | Metabolism                           | 38          |
| Synthesis and degradation of ketone bodies             | Metabolism                           | 30          |
| Brassinosteroid biosynthesis                           | Metabolism                           | 28          |

Supplementary Table 5. Differential expressed unigenes based on KEGG function annotation in transcriptome comparison of FM (Germinated shoot of flowering plant) vs. NM (Germinated shoot of vegetative plant)

| Pathway-term  | Classification                       | Gene number |
|---|--------------------------------------|-------------|
| Phagosome   | Cellular Processes                   | 163         |
| Plant hormone signal transduction                     | Environmental Information Processing | 372         |
| Protein processing in endoplasmic reticulum           | Genetic Information Processing       | 412         |
| Spliceosome   | Genetic Information Processing       | 384         |
| mRNA surveillance pathway                             | Genetic Information Processing       | 269         |
| DNA replication                                       | Genetic Information Processing       | 176         |
| Nucleotide excision repair                            | Genetic Information Processing       | 158         |
| Proteasome  | Genetic Information Processing       | 124         |
| Mismatch repair                                       | Genetic Information Processing       | 122         |
| Starch and sucrose metabolism                         | Metabolism                           | 317         |
| Phenylpropanoid biosynthesis                          | Metabolism                           | 248         |
| Amino sugar and nucleotide sugar metabolism           | Metabolism                           | 246         |
| Fatty acid degradation                                | Metabolism                           | 140         |
| Fatty acid biosynthesis                               | Metabolism                           | 103         |
| alpha-Linolenic acid metabolism                       | Metabolism                           | 90          |
| Flavonoid biosynthesis                                | Metabolism                           | 39          |
| Sesquiterpenoid and triterpenoid biosynthesis         | Metabolism                           | 34          |
| Photosynthesis - antenna proteins                     | Metabolism                           | 34          |
| Stilbenoid, diarylheptanoid and gingerol biosynthesis | Metabolism                           | 30          |
| Circadian rhythm - plant                              | Organismal Systems                   | 86          |

Supplementary Table 6. Differential expressed unigenes based on KEGG function annotation in transcriptome comparison of FL (Flower bud of flowering plant) vs. NL (Leaf bud of vegetative plant)

| Pathway-term                                | Classification                       | Gene number |
|---|--------------------------------------|-------------|

| Glutathione metabolism                                | Metabolism                           | 150         |
| Citrate cycle (TCA cycle)                             | Metabolism                           | 148         |
| Galactose metabolism                                  | Metabolism                           | 126         |
| alpha-Linolenic acid metabolism                       | Metabolism                           | 82          |
| Steroid biosynthesis                                  | Metabolism                           | 79          |
| Carotenoid biosynthesis                               | Metabolism                           | 67          |
| Flavonoid biosynthesis                                | Metabolism                           | 44          |
| Diterpenoid biosynthesis                              | Metabolism                           | 32          |
| Sesquiterpenoid and triterpenoid biosynthesis         | Metabolism                           | 32          |
| Stilbenoid, diarylheptanoid and gingerol biosynthesis | Metabolism                           | 31          |
| Other types of O-glycan biosynthesis                  | Metabolism                           | 15          |
| Flavone and flavonol biosynthesis                     | Metabolism                           | 11          |

Supplementary Table 9. The significantly enriched pathway-terms in transcriptome comparisons of *Pleioblastus pygmaeus*

| Pathway-term                                | FE vs NE<br>q-value | FM vs NM<br>q-value | FL vs NL<br>q-value | FE vs FM<br>q-value | NE vs NM<br>q-value |
|---|---------------------|---------------------|---------------------|---------------------|---------------------|
| Circadian rhythm - plant                    | 1.00                | 0.29                | 0.04                | 0.11                | 1.00                |
| Plant hormone signal transduction           | 3.06E-09            | 1.34E-04            | 0.15                | 1.33E-04            | 1.08E-04            |
| Protein processing in endoplasmic reticulum | 0.86                | 0.19                | 1.00                | 1.00                | 1.00                |
| Starch and sucrose metabolism               | 0.04                | 0.29                | 1.00                | 5.60E-05            | 1.27E-10            |

Supplementary Table 10. Flowering-related unigenes identified in different flowering pathways of *Pleioblastus pygmaeus*

| Gene           | Main participation way | Unigene number |
|----------------|------------------------|----------------|
| <i>ADO1</i>    | photoperiod pathway    | 3              |
| <i>APL</i>     | photoperiod pathway    | 83             |
| <i>BBX19</i>   | photoperiod pathway    | 4              |
| <i>BHLH122</i> | photoperiod pathway    | 1              |
| <i>CCA1</i>    | photoperiod pathway    | 25             |
| <i>CDF1</i>    | photoperiod pathway    | 1              |
| <i>CDF2</i>    | photoperiod pathway    | 11             |
| <i>CDF3</i>    | photoperiod pathway    | 4              |
| <i>CDF4</i>    | photoperiod pathway    | 2              |
| <i>CDF5</i>    | photoperiod pathway    | 1              |
| <i>CKB3</i>    | photoperiod pathway    | 6              |
| <i>CO</i>      | photoperiod pathway    | 6              |
| <i>COL5</i>    | photoperiod pathway    | 13             |
| <i>COL9</i>    | photoperiod pathway    | 9              |
| <i>COP1</i>    | photoperiod pathway    | 17             |
| <i>COP11</i>   | photoperiod pathway    | 2              |
| <i>CPK33</i>   | photoperiod pathway    | 1              |
| <i>CPK6</i>    | photoperiod pathway    | 3              |
| <i>CRY1</i>    | photoperiod pathway    | 23             |
| <i>CRY2</i>    | photoperiod pathway    | 13             |
| <i>ELF3</i>    | photoperiod pathway    | 15             |
| <i>ELF4</i>    | photoperiod pathway    | 10             |
| <i>ESD4</i>    | photoperiod pathway    | 17             |
