

Health resort: XXX

Target: Recreational forest Therapeutic forest

General evaluation scheme (1 - 4) - detailed criteria are defined for each factor

1 (red) = insufficient, not fulfilled, unclear, no

2 (yellow) = need for optimization / limitations present, unclear = status: under development

3 (light green) = good, sufficiently clarified resp. yes

4 (dark green) = optimal resp. very good, completely fulfilled resp. yes

No.	Parameter	Forest area 1	Forest area 2	Alternative LMU	Comment
		Area 1	Area 2	Area 3	
1	Forest size (ha)	●	●	●	
	Forest in % of total area	100 %	100 %	100 %	
2	Ownership	●	●	●●	
3	Reachability (distance from center)	●	●	●	
4	Tranquility in the forest interior	●	●●	●●	
5	Privacy	●	●	●	
6	Accessibility/Walkability	●●	●	●	
7	Forest aesthetics factor according to Stölb (2016)				
7a	Species/structural diversity in the forest/tree stand	●	●	●	
7b	Species/structural diversity on the forest floor	●	●	●	
7c	Topography/small relief in the inventory	●	●	●	
8	Occurrence of special features/highlights	●	●	●	
9	Forest management	●	●	●	
10	Occurrence of conflicts, sources of danger	●	●●	●	
11	Forest environment	●	●	●	

Conclusion:

Forest area 1 must be excluded for certification due to the increased noise pollution. Forest areas 2 and 3 are suitable for the designation of a recreational and therapeutic forest, if all designation requirements (development of a preventive or therapeutic concept, training of medical staff) are met.
