

Figure S1. Land area associated with each elevational band.

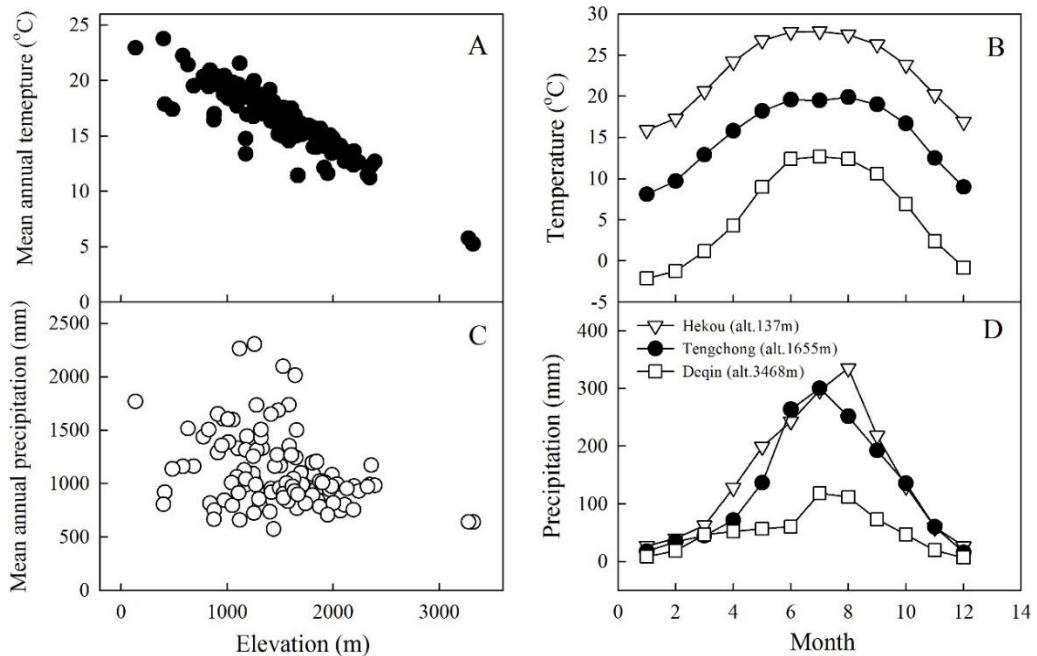

Figure S2. Variations in mean annual temperature and mean annual precipitation with elevation (**A,C**), and monthly temperature and precipitation at different elevations (**B,D**) based on the records of 119 meteorological stations between 1961 and 2004 in Yunnan. The value in parenthesis shows the elevations at each meteorological station.

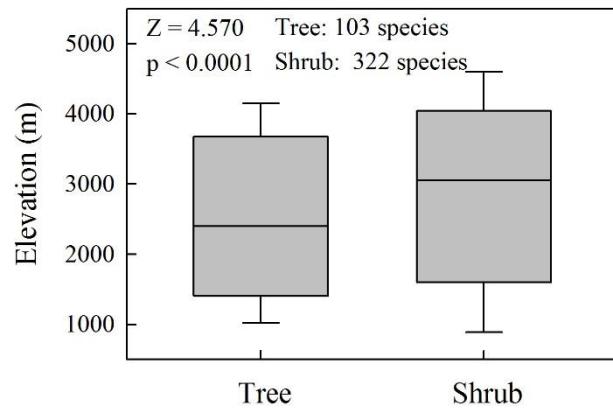

Figure S3. Mean elevation of trees and shrubs with Ericaceae in Yunnan. The elevational difference between trees and shrubs was tested by a Wilcoxon test.
