MNR-1	AB	1	4 (3)	2 (3)	-	-	-	-	-	-
	BC	4	-	12 (12)	12 (12)	-	0	1	3.84	> 0.99

[§]number of trees that shows the relative genotypes; ^{§§}the expected value is the one in the parentheses; [†] $n = 2$, the number of allele in the heterozygous genotype.

Table S3. Pairwise genetic distance among sampled subpopulations based on Nei's minimum distance (below the diagonal) and pairwise morphoanatomical Euclidean distance (above diagonal).
