

## Supplementary Materials

Associations of probiotic fermented milk (PFM) and classic yogurt consumption with *Bifidobacterium* and *Lactobacillus* components the gut microbiota in healthy adults

**Table S1.** Relative abundance (%; median (IQR)) of bacterial phyla in PFM groups.

PFM groups				
% Relative abundance	Nonconsumers (175)	Consumers (85)	p value*	FDR critical value
<b>Firmicutes<sup>#</sup></b>				
Men	60.21 (54.09–67.66)	63.87 (57.65–72.29)	0.089	0.075
Women	58.97 (53.12–64.46)	56.45 (48.59–61.69)	0.057	0.037
Bacteroidetes	24.16 (18.05–30.70)	23.32 (15.49–34.07)	0.787	0.085
<b>Proteobacteria<sup>#</sup></b>				
Men	4.898 (3.903–5.750)	4.274 (3.132–5.489)	0.065	0.050
Women	5.332 (4.240–6.480)	4.782 (4.079–6.580)	0.269	0.100
Actinobacteria	1.987 (0.988–3.989)	2.575 (1.380–5.190)	0.017	0.028
Cyanobacteria	0.298 (0.195–0.498)	0.284 (0.168–0.671)	0.579	0.057
Verrucomicrobia	0.190 (0.011–0.938)	0.156 (0.008–1.213)	0.899	0.100
Tenericutes	0.115 (0.069–0.228)	0.075 (0.053–0.129)	<0.001	<b>0.014</b>
Synergistetes	0.077 (0.038–0.125)	0.0723 (0.038–0.097)	0.282	0.042
<b>Spirochaetes<sup>#</sup></b>				
Men	0.006 (0.003–0.013)	0.009 (0.005–0.019)	0.045	0.025
Women	0.008 (0.005–0.017)	0.016 (0.006–0.020)	0.026	0.012
Acidobacteria	0.007 (0.001–0.006)	0.003 (0.001–0.006)	0.770	0.070
<b>Fusobacteria<sup>#</sup></b>				
Men	0.002 (0.001–0.005)	0.002 (0.007–0.003)	0.073	0.062
Women	0.003 (0.001–0.005)	0.004 (0.002–0.008)	0.097	0.087

\*PFM consumption effect according to Mann–Whitney U test. Those variables whose p values were lower than their FDR critical value were considered significant.

<sup>#</sup> Gender significantly affected the taxa relative abundance.

Table S2. Relative abundance (%; median (IQR)) of the main bacterial genera ( $>0.5\%$ ), and those low-abundance genera (below 0.5%) showing significant differences between PFM groups.

	PFM groups		<i>p</i> value*	FDR critical value
% Relative abundance	Nonconsumers (175)	Consumers (85)		
<i>Bacteroides</i>	12.67 (7.790-19.73)	13.75 (6.947-19.60)	0.894	0.089
<i>Blautia</i>	7.956 (6.199-9.767)	7.746 (6.085-9.618)	0.452	0.057
<i>Faecalibacterium</i>	7.408 (5.619-9.985)	8.169 (5.163-9.755)	0.756	0.079
<i>Ruminococcus</i>	4.624 (3.661-5.860)	4.516 (3.085-5.964)	0.438	0.050
<i>Clostridium</i>	4.114 (3.294-5.341)	3.974 (2.686-5.685)	0.274	0.036
<i>Alkaliphilus</i> <sup>#</sup>				
Men	1.901 (1.178-3.882)	2.070 (1.060-3.668)	0.953	0.094
Women	0.885 (1.950-3.430)	1.372 (0.738-2.474)	0.123	0.017
