

## Supplementary Materials

Table S1. Comparison indicators in 2008 and 2021 and their key revision

Indicators	2008	2021	Key revision
Introduction of solid, semi-solid or soft foods 6–8 months (ISSSF)	/	/	Calculation is now based on the food list question rather than the frequency of feeding question
Minimum dietary diversity 6–23 months (MDD)	/	/	Breast milk added as an eighth food group and cut-off for minimum increased to five food groups
Minimum meal frequency 6–23 months (MMF)	/	/	At least one non-milk feeding is required to meet minimum for non-breastfed children while the previous definition allowed children to achieve the minimum with milk feeds only.
Minimum acceptable diet 6–23 months (MAD)	/	/	
Consumption of iron-rich or iron-fortified foods	/	x	
Minimum milk feeding frequency for non-breastfed children 6–23 months (MMFF)	/	/	
Egg and/or flesh food consumption 6–23 months (EFF)	x	/	
Sweet beverage consumption 6–23 months (SwB)	x	/	
Unhealthy food consumption 6–23 months (UFC)	x	/	
Zero vegetable or fruit consumption 6–23 months (ZVF)	x	/
