

Supplementary Materials

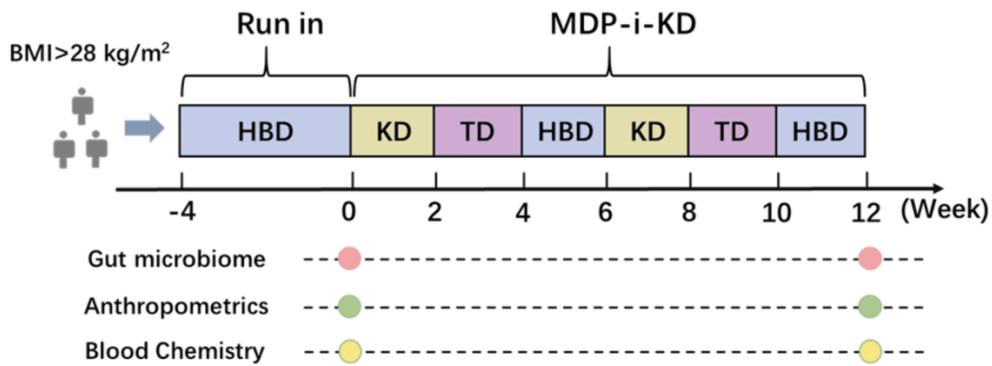

Figure S1. Study design. KD, ketogenic diet; TD, transition diet; HBD, hypocaloric balanced diet.

Table S1. Nutrient component of the KD, TD and HBD.

Nutrient component	KD ¹	TD ²	HBD ³
Carbohydrate, % of energy	27	29	39
Fat, % of energy	41	42	37
Protein, % of energy	32	29	24

KD¹, ketogenic diet. According to the actual measured basal metabolism of the patient's InBody S10 body composition meter, the total calories for this stage. If the basal metabolism exceeds 1500 kcal, it will be calculated as 1500 kcal. TD², transition diet. Multiply the basal metabolism actually measured by the patient's InBody S10 body composition meter by 1.1 to calibrate the total calories for this stage. HBD³, hypocaloric balanced diet. Multiply the basal metabolism actually measured by the patient's InBody S10 body composition meter by 1.2 to calibrate the total calories for this stage.

Table S2. Food selection range of the KD, TD and HBD.

Food category	KD	TD	HBD
Carbohydrate	Whole grains, bran, try to choose carbohydrates with a GI value of less than 55 as the staple food	Whole grains, bran and other miscellaneous grains, try to choose carbohydrates with a GI value of less than 65 as the staple food, and add potatoes	Whole grains, potatoes, brown rice, rice noodle products, carbohydrates with a GI value of less than 65 should account for 50% of the total carbohydrates

Fat	olive oil, linseed oil	Olive oil, linseed oil, tea seed oil	Olive oil, linseed oil, tea seed oil
Lean meat	livestock lean meat, poultry lean meat	livestock lean meat, poultry lean meat	livestock lean meat, poultry lean meat
Vegetable	Tender stems, leaves, cauliflower, onion and garlic, fungus and algae	Tender stems, leaves, cauliflower, onion and garlic, fungus and algae Can be added: eggplant fruit, melons and vegetables	Tender stems, leaves, cauliflower, onion and garlic, fungus and algae Can be added: eggplant, melons and vegetables, aquatic vegetables
Aquatic products	freshwater fish, freshwater shrimp	freshwater fish, freshwater shrimp Can add sea fish and shrimp	Freshwater fish, freshwater shrimp Can add sea fish, shrimp, shellfish
Fruit	\	Apple, kiwi, citrus	Apple, kiwi, citrus
Nut	\	Walnuts, pistachios, almonds, cashews, etc.	Walnuts, pistachios, almonds, cashews, etc.

KD, ketogenic diet; TD, transition diet; HBD, hypocaloric balanced diet; GI:Glycemic Index.

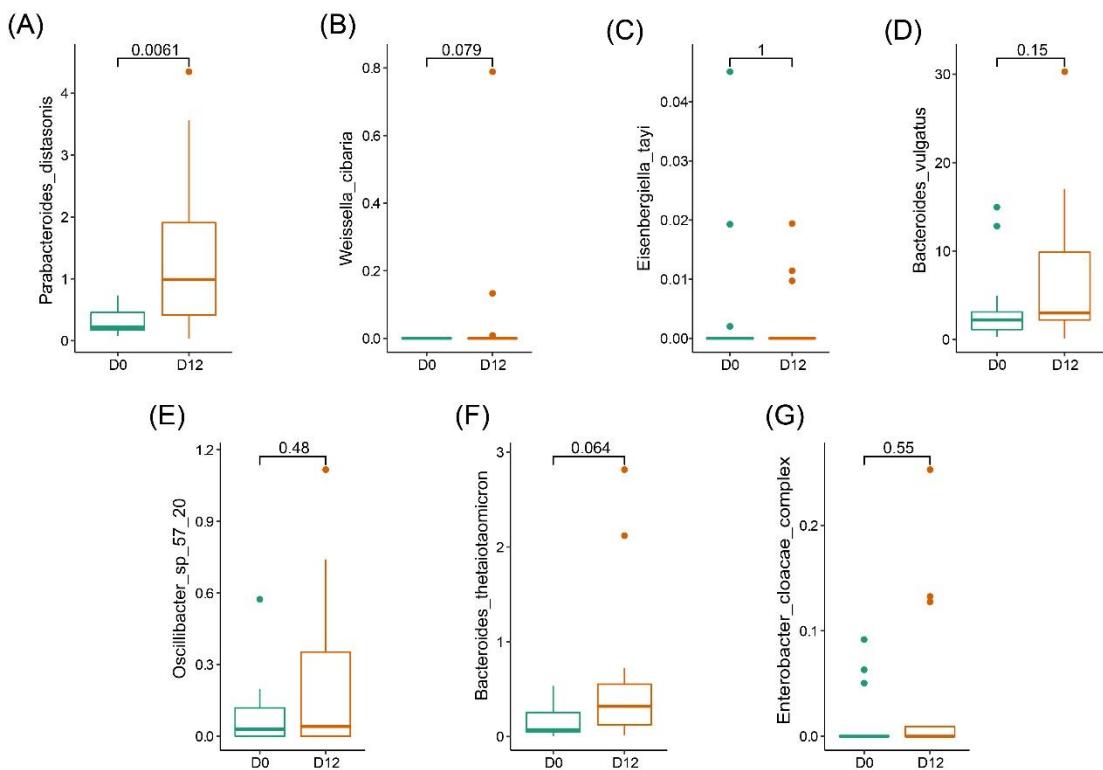

Figure S2. Alterations in the relative abundance of seven microbial features Identified by GB feature selection method pre- and post-intervention.

Table S3. Gut microbiota metabolic pathways with relatively high contribution of (a) *Blautia obeum*; (b) *Ruminococcus torques*.

Metabolic Pathway	Function	(a)		P value
		D0 (mean)	D12 (mean)	
ARO-PWY	Branched acid biosynthesis I	18614.038	16344.379	0.039
BRANCHED-CHAIN-AA-SYN-PWY	Super channel of branched chain amino acid biosynthesis	11797.022	10511.632	0.264
