Table S1. Detailed clinical information of the glioma patients. F, female; M, male; KPS, Karnofsky Performance Scale score; OS, overall survival (where there is no number, patients are still alive); WHO, World Health Organization; GTR, gross total resection (or complete macroscopic tumor removal); *IDH*, isocitrate dehydrogenase; *ATRX*, alpha-thalassemia/mental retardation syndrome, X-linked; *TP53*, tumor protein p53; N/A, test not needed or not performed.
