

Supplementary Material

Hyperglycemia Associated Metabolic and Molecular Alterations in Cancer Risk, Progression, Treatment, and Mortality

Pranay Ramteke, Ankita Deb, Varsha Shepal and Manoj Kumar Bhat

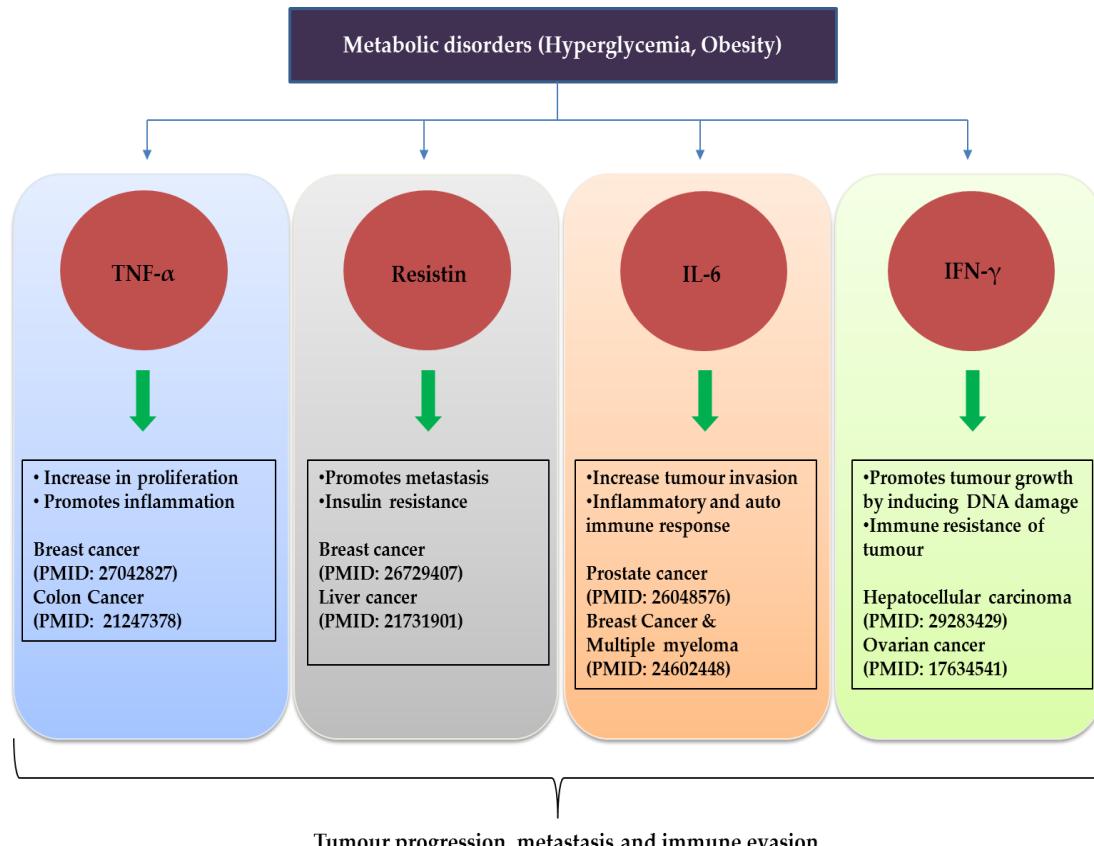

Figure S1. Metabolic disorders and cytokine signaling in cancer.

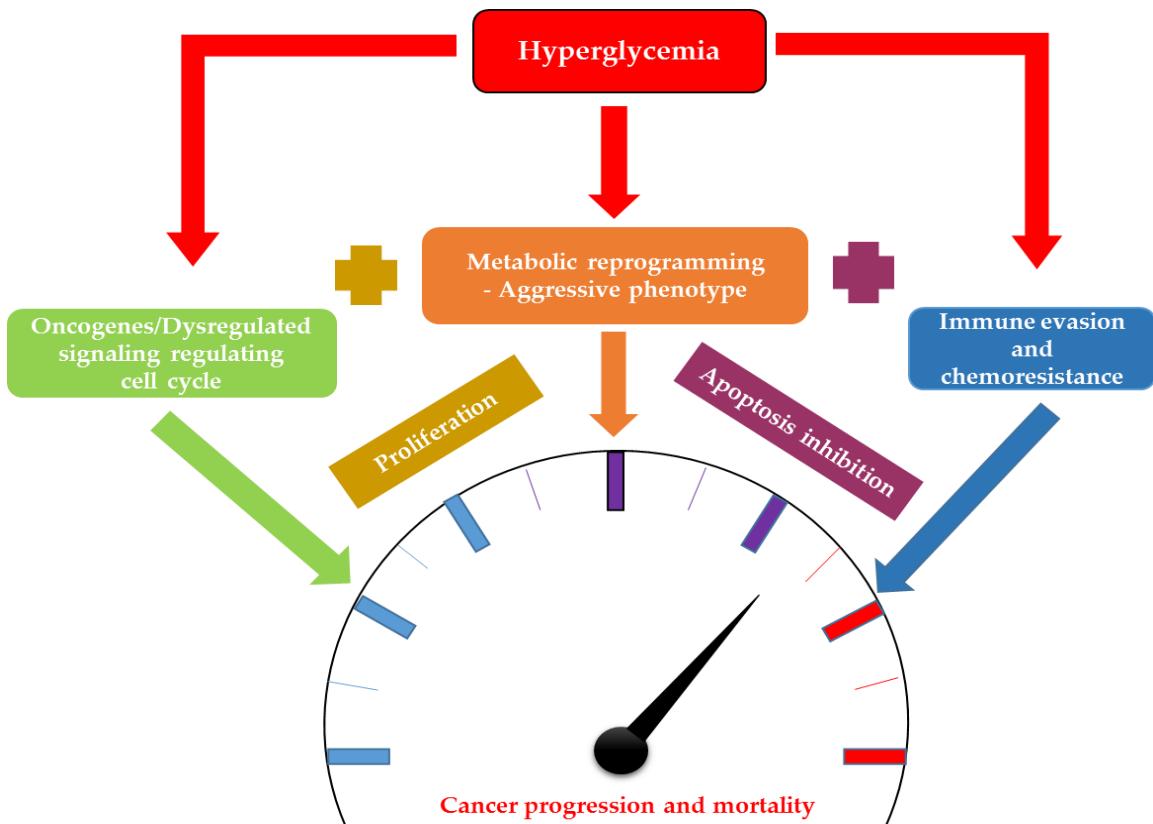

Figure S2. Combinatorial effect of hyperglycemia associated alterations in cancer.

Table S1. Increased mortality of different cancers under hyperglycemic/diabetic conditions.

Reference	Cancer	Hazard ratio/Mortality rate (%)
Adeberg et.al., 2016 [1]	Glioblastoma	2.44
Arrieta et.al., 2016 [2]	Non-small cell lung cancer	2.04
Cheon et.al., 2014 [3]	Pancreatic cancer	2.55
Erickson et. al., 2011 [4]	Early stage breast cancer	2.35
Hosokawa et.al., 2013 [5]	Hepatocellular carcinoma	2.77
Hu et.al., 2017 [6]	Gastric cancer	1.53
Li et.al., 2017 [7]	Cervical cancer	4.35
Okamura et.al., 2017 [8]	Esophageal cancer	1.72
Duan et.al., 2014 [9]	Endometrial, breast and colorectal cancer	41%
