

Table S1. Oligonucleotides designed for sited directed mutagenesis of p.*nasABC* region and for obtaining biotinylated DNA samples.

Oligonucleotide	Sequence	Target
PAL1-1_for	GAGAACCTTCTCACCGCG AAAA CCGGGTATA-CAGGGACGC	Modification of palindromic sequence by sited directed mutagenesis
PAL1-1_rev	GCGTCCCTGTATAACCCGG TTTT CGCGGTGA-GAAGGTTCTC	
PAL1-2_for p.nas_rev	GGGACGCCCGGTGGACCGCACGACG ACCACACCCCATGGCACAGCGCAT	Promoter amplification without palindromic region
PAL2-1_for	ATATTCTTAGTATACTGTT CTCGT ATTGCACGA-TATGGGG	Modification of putative consensus binding site sequence by sited directed mutagenesis
PAL2-1_rev	CCCCCATATCGTCAAT ACGAG AACGTATACTAA-GAATAT	
PAL2-2_for	GTATAACGTTTG GGCCC GCACGATATGGGGAATT- GGCGG	Modification of putative consensus binding site sequence by sited directed mutagenesis
PAL2-2_rev	CCGCCCAATTCCCCATATCGTGC GGGCC ACAAAC-GTATAAC	
pVA-for-Biot N-bGal-rev	GCTCGGAATTAAACCTCACTAAAG GCTCCGGAAATAGCAGACAC	Biotinylated p. <i>nasABC</i>
p.fdx_for p.fdx_rev-Biot	TACTTCGTACCGCGCTGTTCT GTTACCGTGGCATCAACAA	Biotinylated p. <i>fdx</i>
Glc_for Glc_rev-Biot	GCATTGGTAAACATATGAAAGC GTGAAGAACTGGACATGTAC	Biotinylated glucose dehydrogenase

The mutant sequences are shown in red color.

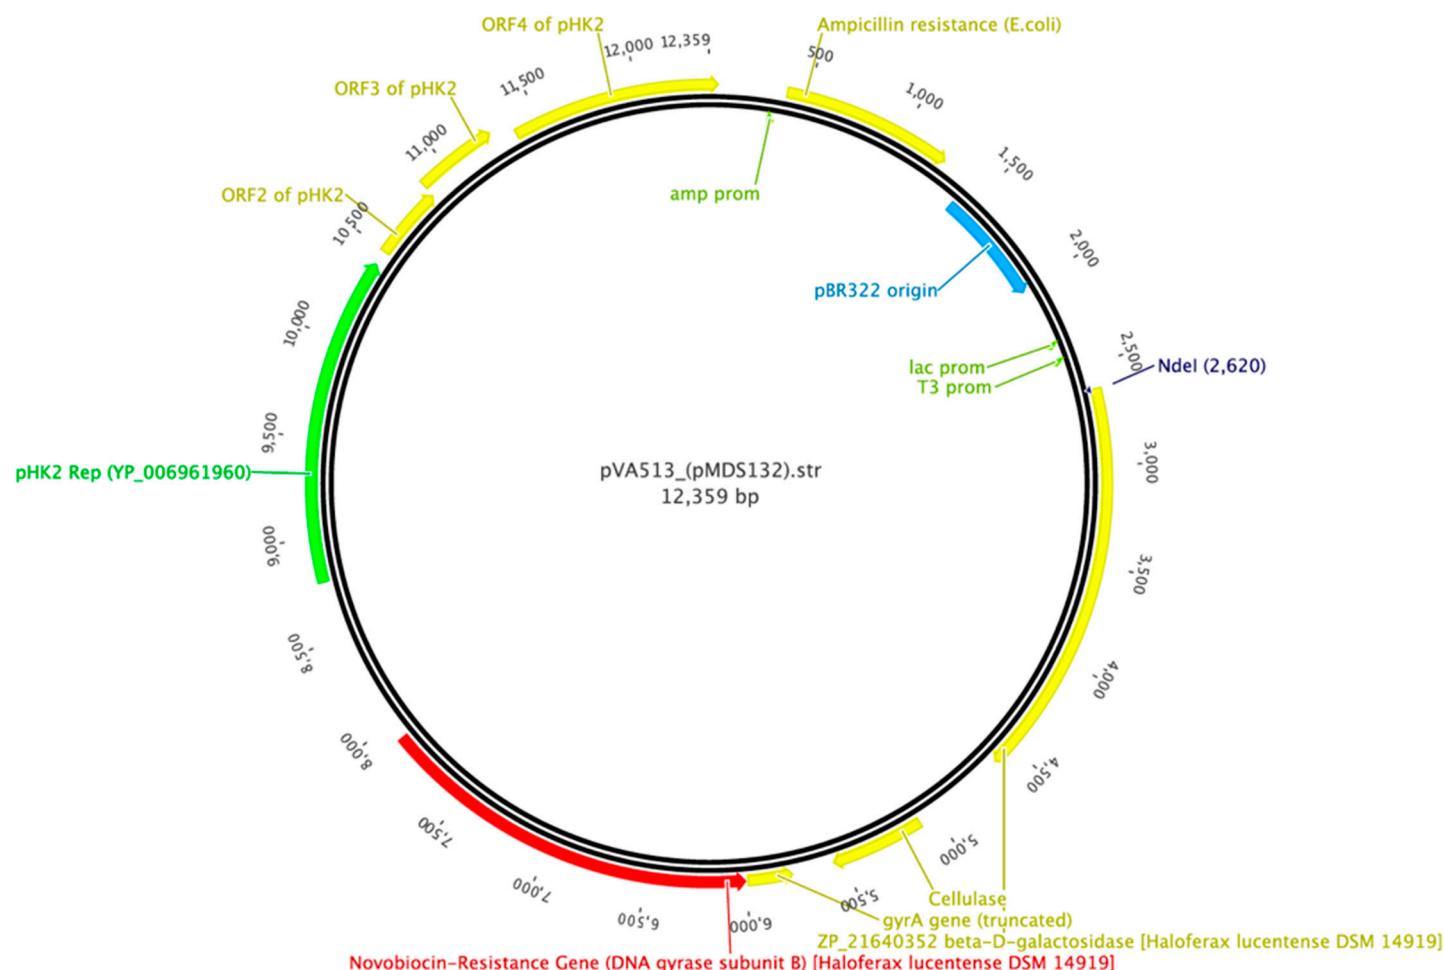

Figure S1. pVA513 halophilic expression vector, which was kindly provided by Mike Dyall-Smith (University of Melbourne, Australia).

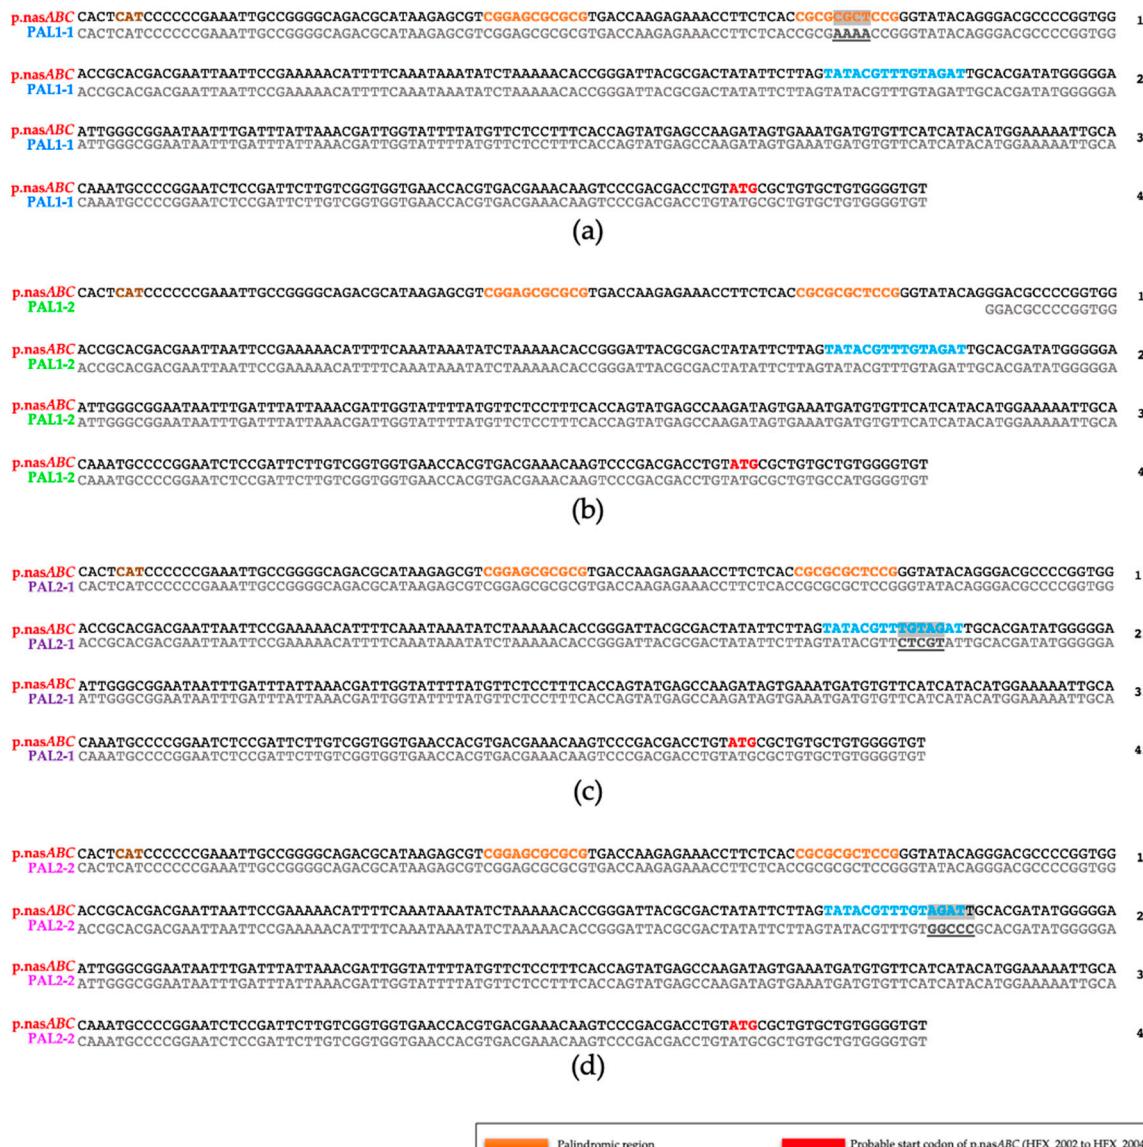

Figure S2. Sequence of promoter region in pVA-PAL1-1 (a), pVA-PAL1-2 (b), pVA-PAL2-1(c), and pVA-PAL2-2 (d).

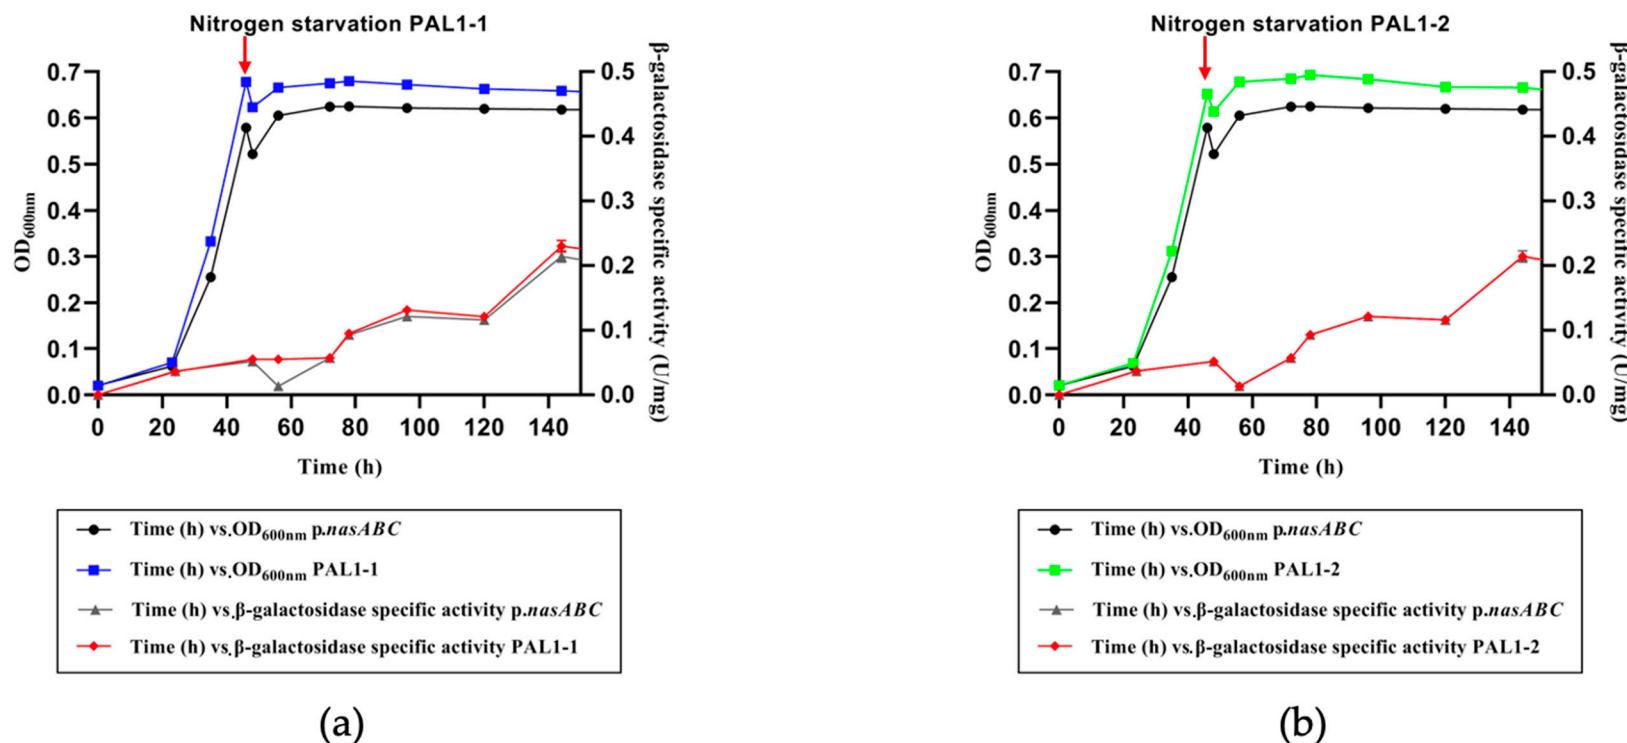

Figure S3. Cell growth, followed by measuring OD_{600nm}, and β-galactosidase specific activity, determined for *Hfx. mediterranei* p.nasABC PAL1-1 transformants (a) and PAL1-2 transformants (b) under nitrogen-starved conditions. Time point where nitrogen starvation starts is indicated with a red arrow.
