

# Supplementary Materials: Archaeometric study of the white marbles from Madonna della Febbre altar in San Domenico Church (Cosenza-Southern Italy)

Natalia Rovella , Stefania Bosco and Donatella Barca

**Table S1.** Manganese concentration (in ppm) determined by ICP-MS in samples (SD2, SD3, SD4) and Standard Reference Material (Mica Schist SDC1) by USGS. The measurements were repeated three times, thus mean and deviation standard were calculated and reported in the table.

	SD2	SD3	SD4	Standard Reference Material Mica Schist SDC1	Mica Schist SDC1 Certified value	Mica Schist SDC1 Measured value	Precision Std/ Mica Schist SDC1 Meas- ured in %	Accuracy Certi- fied/Measured in %
<b>Mn (ppm)</b>	14.5	379	11.7	Mica Schist SDC1	880	906	7.28	-2.95
<b>Std +/-</b>	1.01	15.3	0.77	std +/-	60	66		
<b>Detection Limit</b>	0.17
