

Biosensors-Based In Vivo Quantification of 2-Oxoglutarate in Cyanobacteria and Proteobacteria

Hai-Lin Chen, Amel Latifi, Cheng-Cai Zhang and Christophe Sébastien Bernard *

Figure S1. SDS-PAGE gels stained with Coomassie Blue for recombinant biosensors expressed in *E. coli* BL21 (DE3). (A) F-mT_PII (B) F-mT_NtcA (C) F-mT_PII^{K58M} (D) F-mT_NtcA^{R88E}. M: Ladder; C-: total cells before induction; TC: Total cells after addition of 100 μ M IPTG for 12 h at 17°C; FT: Flow through the immobilized metal ion chromatography. The proteins were eluted with different concentration of imidazole. The protein band is indicated with arrow.
