

Supplementary Table S2 Rates of trifecta achieved and univariable logistic regression predicting trifecta status (trifecta achieved vs trifecta not achieved) according to SuNS score and derived complexity classes.

SuNS score	Rate of trifecta achieved	Odds ratio	p-value	Complexity classes	Odds ratio	p-value
3	91%	Ref		Low	Ref	
4	84%	1.9	0.1			
5	77%	3.1	0.005	Moderate	3.3	<0.001
6	64%	5.6	<0.001			
7	47%	11.1	<0.001	High	14.3	<0.001
8	20%	40.0	<0.001			

Bold values indicate statistical significance $p < 0.05$.

SuNS: Su(rface), N(earness to renal sinus or collecting system), S(ize); CI: confidence interval.
