

**Supplementary Materials** for “Monitoring Nutrient Status of Brown Marmorated Stink Bug Adults and Nymphs on Summer Holly” by Skillman, Wiman and Lee in “Insects”

**Table S1.** The average nutrient level per mg ( $\pm$  SE) for adult, female and male, and nymphal BMSB. Different letters denote significant difference between months by Tukey HSD for each nutrient-sex-year grouping (statistical outputs similar to Table 3, not shown); no statistics on nymphs.
