The authors wish to make the following change to their paper (Pullen and Oser 2017). The paper was supported with two funding sources. One grant number was missing from the original paper. The correct funding sources are included in the Acknowledgements section below. The authors would like to apologize for any inconvenience caused to the readers by this change. The change does not affect the results and we apologize for the oversight. The manuscript will be updated and the original will remain online on the article webpage.

Acknowledgments: This research was funded by the National Institute on Drug Abuse (R01-DA22967, K02-DA35116, PI: C. Oser). This work would not have been possible without the cooperation of the Kentucky Department of Corrections; however, our findings are our own and do not necessarily represent their views. We also acknowledge the participants who openly shared their experiences and the tireless work of interviewers. Finally, we greatly appreciate the feedback of peer reviewers and colleagues who provided comments on earlier versions of this manuscript. A special note of thanks to the first author's dissertation committee members (including the second author): Brea Perry, Claire Renzetti, and Carl Leukefeld.
