

Supplementary Figure S1. Competitive ELISA assay. The figure shows the results of the reaction against the specific peptide HERV-K env₁₀₉₋₁₂₆ of a plasma of a positive patient sample that has been pre-incubated with: no peptide, a different positive peptide (Annexin A2 ₁₃₋₃₇ LEGDHSTPPSAYGSVKAYTNFDAER) and the peptide of interest (HERV-K env₁₀₉₋₁₂₆). *(The experiment was performed in triplicate)
