**Table S1.** Summary results of real-time PCR for porcine circovirus type 3 (PCV3), porcine circovirus type 2 (PCV2) and porcine reproductive and respiratory syndrome virus (PRRSV) in samples collected from stillborn or aborted fetuses (fetal material - FM). “-” indicates result with Ct>37. From each stillborn piglet or aborted fetus 1-4 pooled samples were prepared consisting of different internal organs (heart, lungs, kidney, liver, spleen), body cavity fluid or umbilical cords.

These samples were tested using real-time PCR assays described in the following articles:

1. Wozniak, A.; Milek, D.; Baska, P.; Stadejek, T. Does porcine circovirus type 3 (PCV3) interfere with porcine circovirus type 2 (PCV2) vaccine efficacy? *Transbound. Emerg. Dis.* **2019**, *66*,1454–1461
2. Wozniak, A.; Milek, D.; Matyba, P.; Stadejek, T. Real-time PCR detection patterns of porcine circovirus type 2 (PCV2) in Polish Farms with different Status of vaccination against PCV2. *Viruses* **2019**, *11*(12), 1135
3. Stadejek, T.; Larsen, L.E.; Podgorska, K.; Botner, A.; Botti, S.; Dolka, I.; Fabisiak, M.; Heegaard, P.M.H.; Hjulsgaard, Ch.K.; Huc, T.; Kvisgaard, L.K.; Sapierzynski, R.; Nielsen, J. Pathogenicity of three genetically diverse strains of PRRSV Type 1 in specific pathogen free pigs. *Vet. Microbiol.* **2017**, *209*, 13-19
