**Tabela S5:** Fungal isolates (MALDI Score  $\geq 2.00$ ) from the sampling sites Lepe jame and Vivarium in Postojnska jama and from the sampling site Šotor in Škocjanske jame, their risk group assignment and typical habitat. Concentrations (CFU/m<sup>3</sup>) and percentages (%) of isolates based on flow cytometry results.

Fungal isolates	Lepe jame		Vivarium		Šotor		Locations Combined		Risk Group	Typical habitat
	Fungi (CFU/m <sup>3</sup> (%))		Fungi (CFU/m <sup>3</sup> (%))		Fungi (CFU/m <sup>3</sup> (%))		Fungi (CFU/m <sup>3</sup> )			
	Before tourists	After tourists	Before tourists	After tourists	Before tourists	After tourists	Before tourists	After tourists		
<i>Aspergillus fumigatus</i> *	17 (1.41)	NP	NP	NP	NP	NP	0-17	NP	2 (AU, CA, CH, DE, EU)	Ubiquitous, air, dust, plants
