Figure S3: Significant Pearson correlations between ASVs and SCFAs at T_0 (A) and T_1 (B) with motricity index (MI_TOT).
(A1) Christensenellaceae; (A2) Acetic acid; (B1) *Bacteroides*; (B2) *Clostridium* (Lachnospiraceae).
Only statistically significant (*p*-value ≤ 0.05) correlations between ASVs, SCFAs and MI_TOT were showed.
