Figure S1. Identification of ORFs encoding GraF in *Staphylococcus* strains. A. Flanking region of the *GraF* gene. The *GraF* gene is located between two ORFs encoding ‘Hypothetical protein’ and ‘ECF transporter S component’ in the genome of DSM 20231^T. The GenBank IDs for the genomic sequences and the locations of the predicted *GraF* gene in the strains, DSM 6717^T, NCTC 12196^T, and NCTC 11320^T, were shown below. B. An alignment of predicted amino acid sequences of GraF. Sequence similarity scores (%) to the GraF protein in DSM 20231^T were shown right.
