

Supplementary Materials:

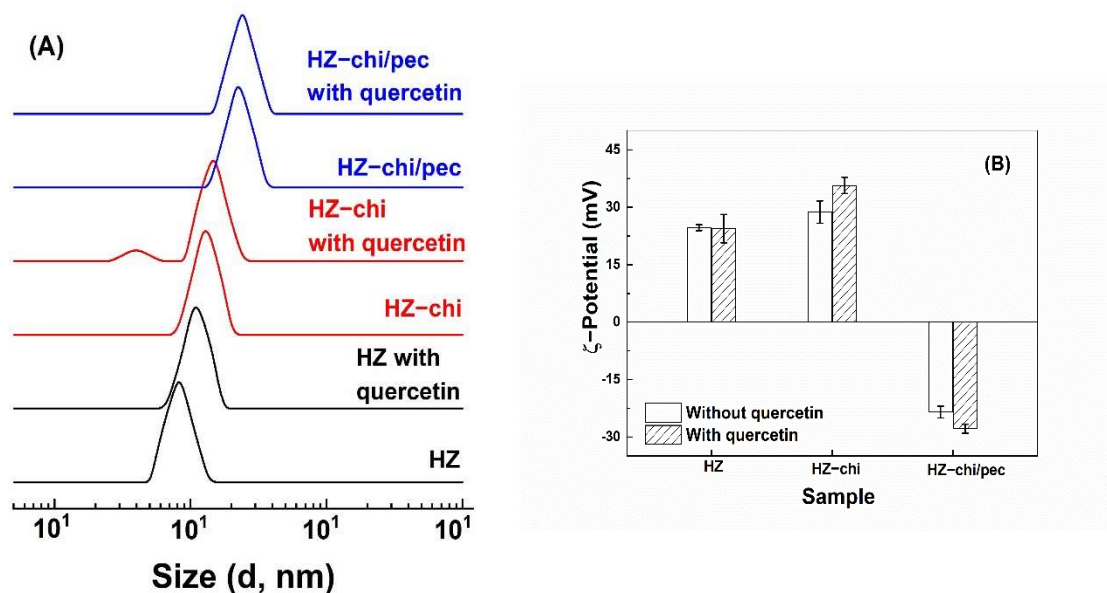

Figure S1. Size distribution (A) and ζ -potential (B) of hollow zein (HZ) particles coated with chitosan (HZ-chi) and with chitosan and pectin (HZ-chi/pec) without and with quercetin.

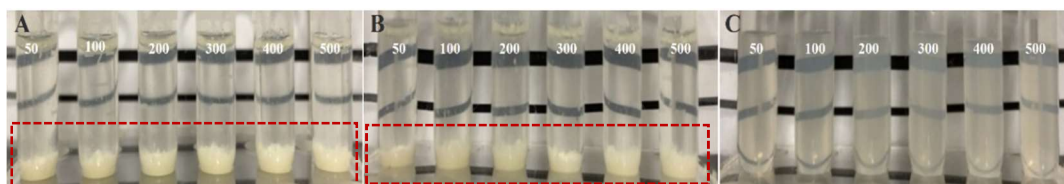

Figure S2. Visual appearance of quercetin-loaded hollow zein particles (A) coated with chitosan (B) and with chitosan and pectin (C) at 50 - 500 mM NaCl.

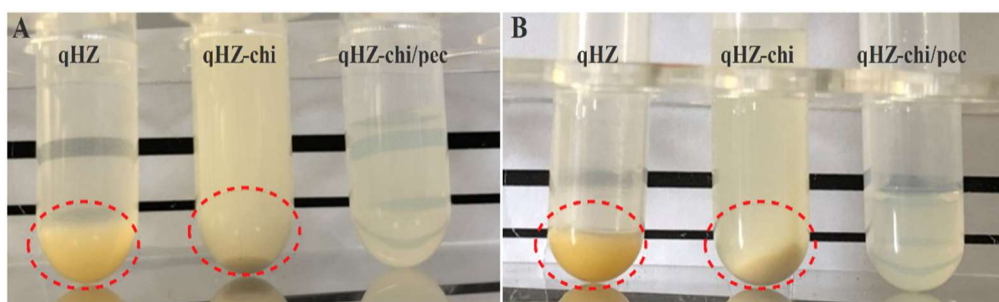

Figure S3. Visual appearance of qHZ, qHZ-chi, qHZ-chi/pec at 25°C (A), 45°C (B).

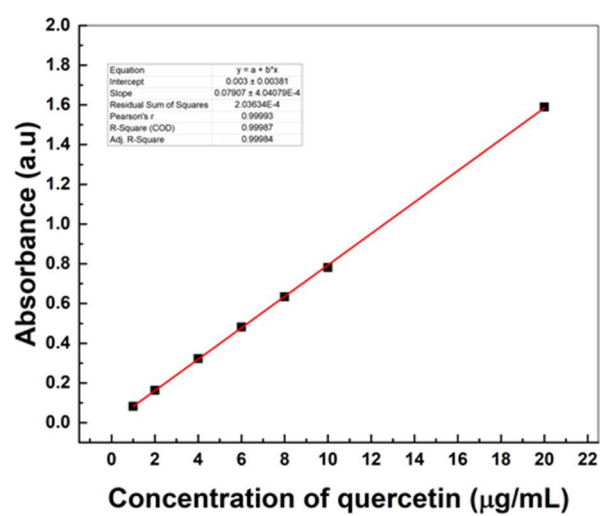

Figure S4. Calibration curve of quercetin
