Figure S2. Chromatograms of each detection wavelength for GP and GPP analyzed by HPLC-DAD at (a) 280 nm, (b) 320 nm and (c) 360 nm and (d) 520 nm.

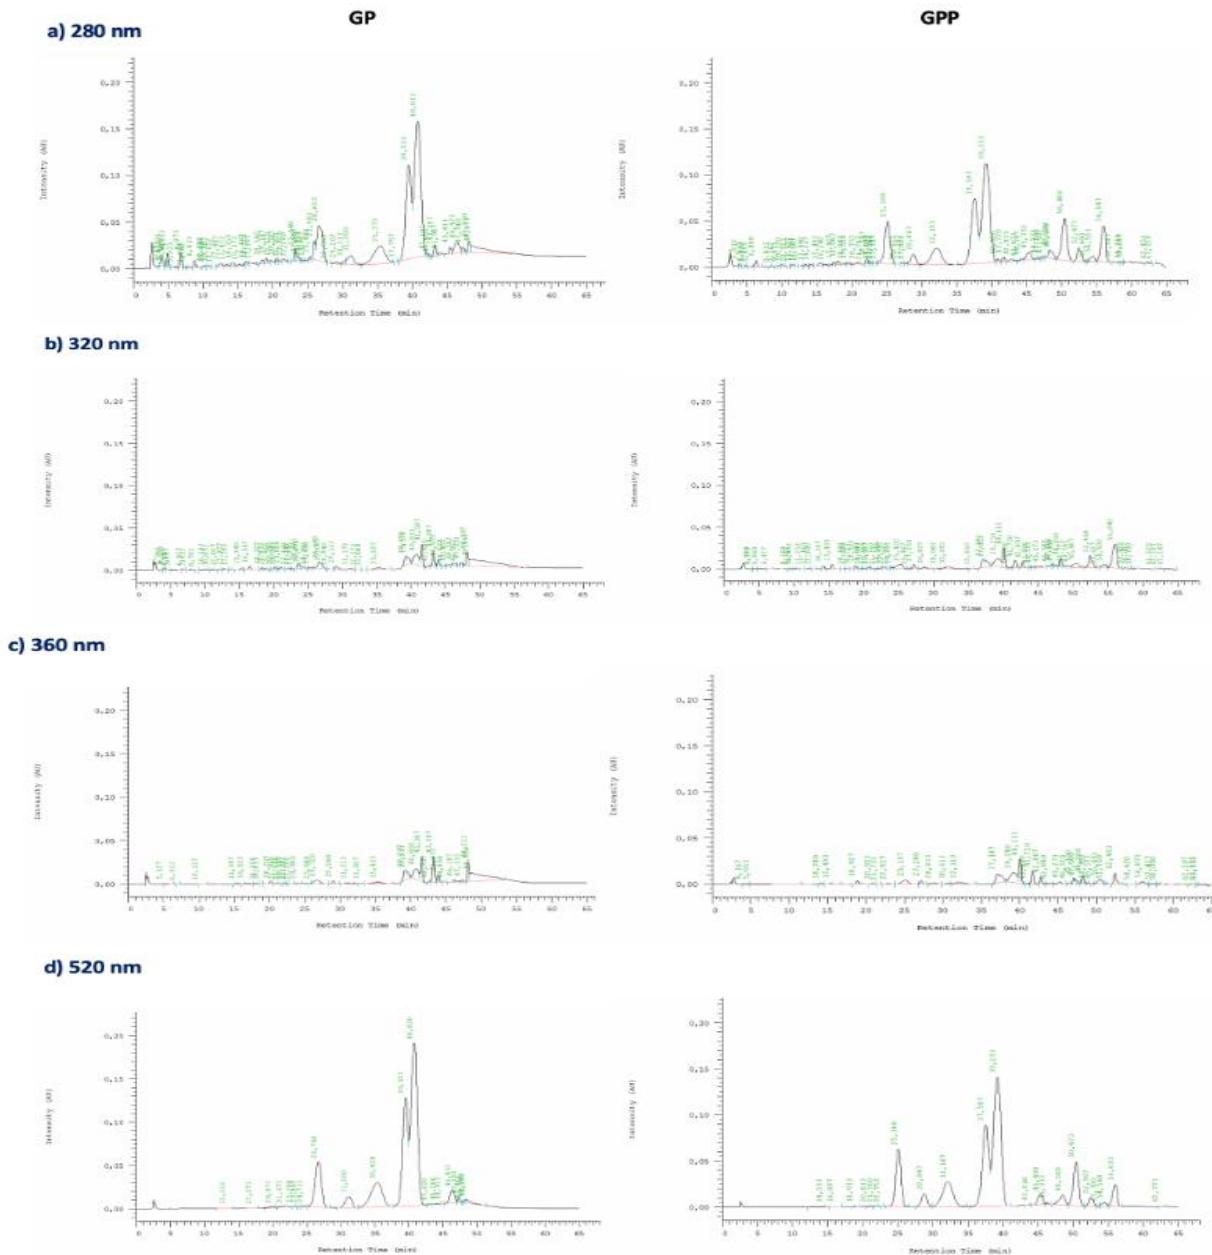

Table S1. Summary of conditions of the preparation of spray-drying

Conditions used	SD
Inlet air Temperature (°C)	120
Feed flow rate (mL min-1)	4
Wall material content (% w v-1)	20

SD: Spray-Drying (powder)

Table S2. Mean values for loading capacity, powder recovery and entrapment efficiency of powder based on grape pomace obtained by spray-drying.

Formulation Method ¹	Loading capacity ²	Powder Recovery ³	Entrapment Efficiency ⁴
SD	77.06	42.04	41.10

1SD: Spray-Drying (powder); 2Loading capacity was expressed as g total phenolic compounds per 100 g-1 powder; 3Powder Recovery was expressed as g powder per 100 g-1 initial solids; 4Entrapment efficiency was expressed as g total phenolic compounds encapsulated per 100 g-1 phenolic compounds from pomace added.
