Table S1. The different batches of the biogas digestate from swine manure.

Experiment batch	Sampling batch	Sampling time	Temperature (°C)
1	1	2017/12/5	12
2			
3	2	2017/12/8	10.5
4			
5	3	2017/12/12	9
6			
7	4	2017/12/16	8
8			

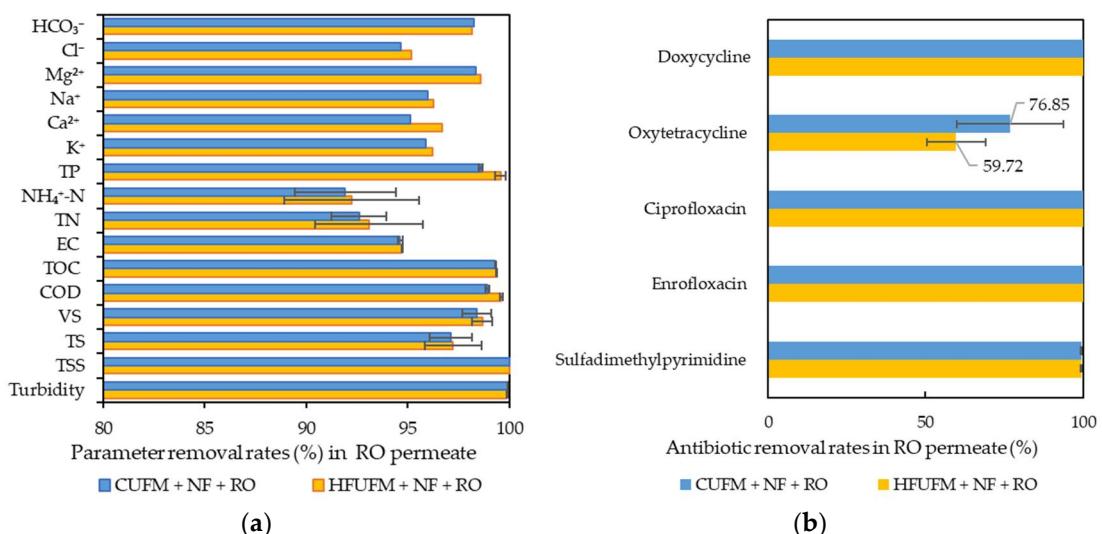

Figure S1. The Rrs (%) of (a) physical and chemical parameters and (b) antibiotics content in RO permeates with HFUFM and CUFM pretreatment method.

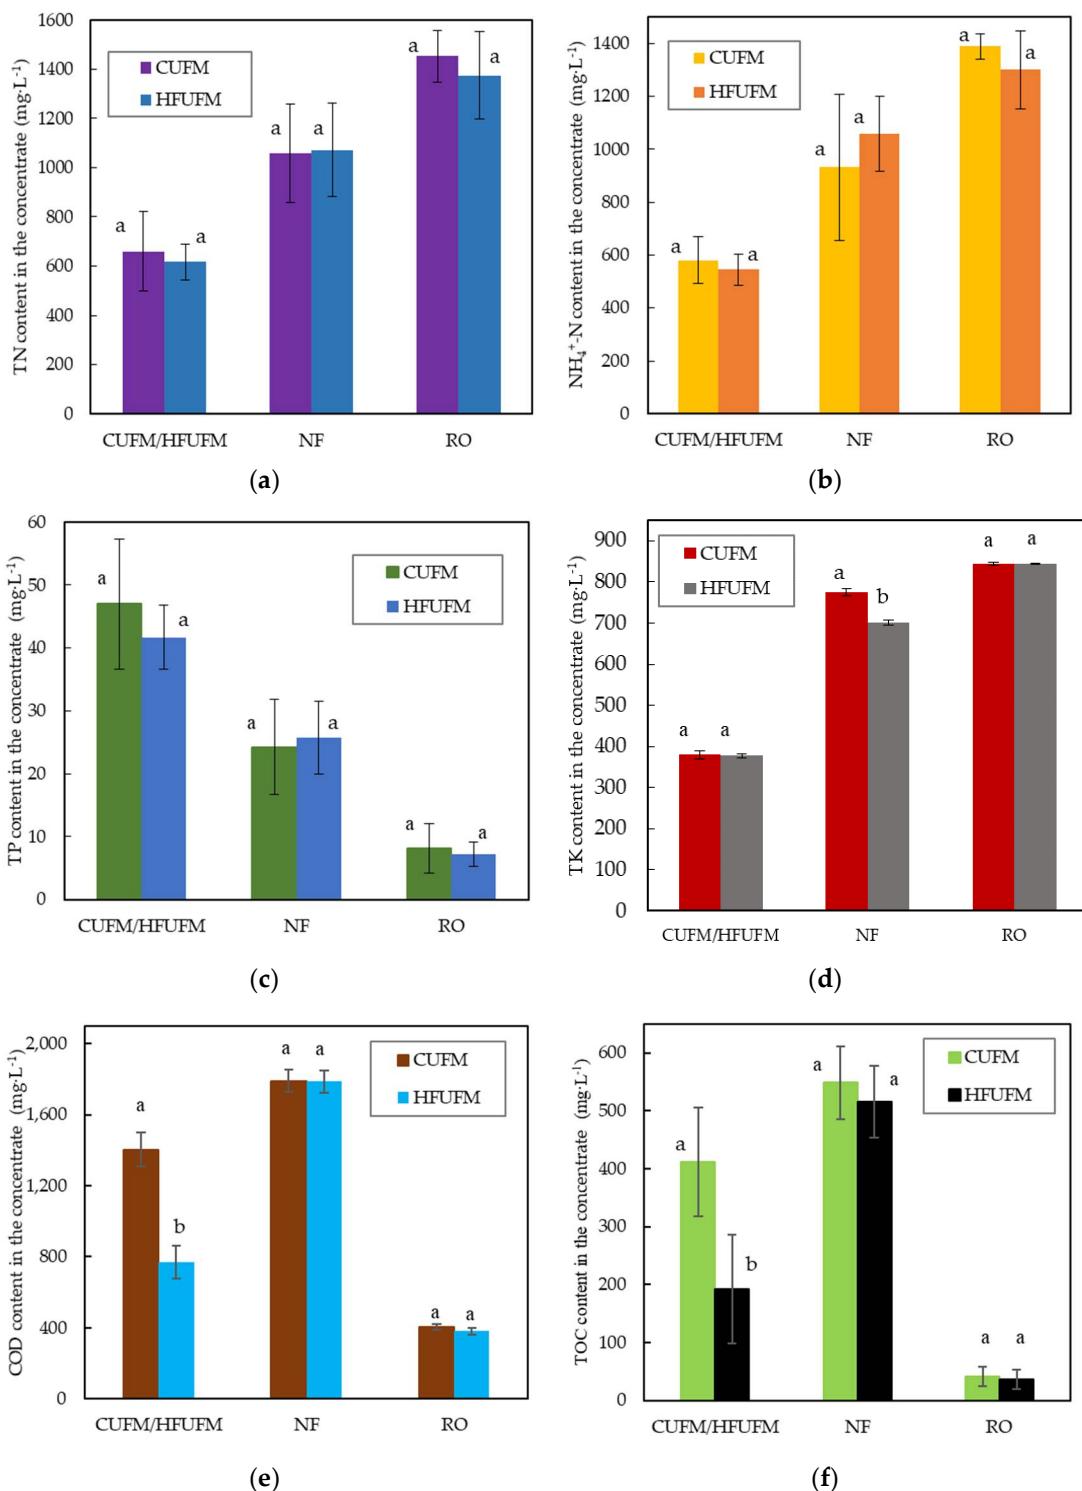

Figure S2. The content of (a) TN, (b) $\text{NH}_4^+ \text{-N}$, (c) TP, (d) TK, (e) COD, (f) TOC in the concentrates of the integrated process with HFUFM and CUFM pretreatments.

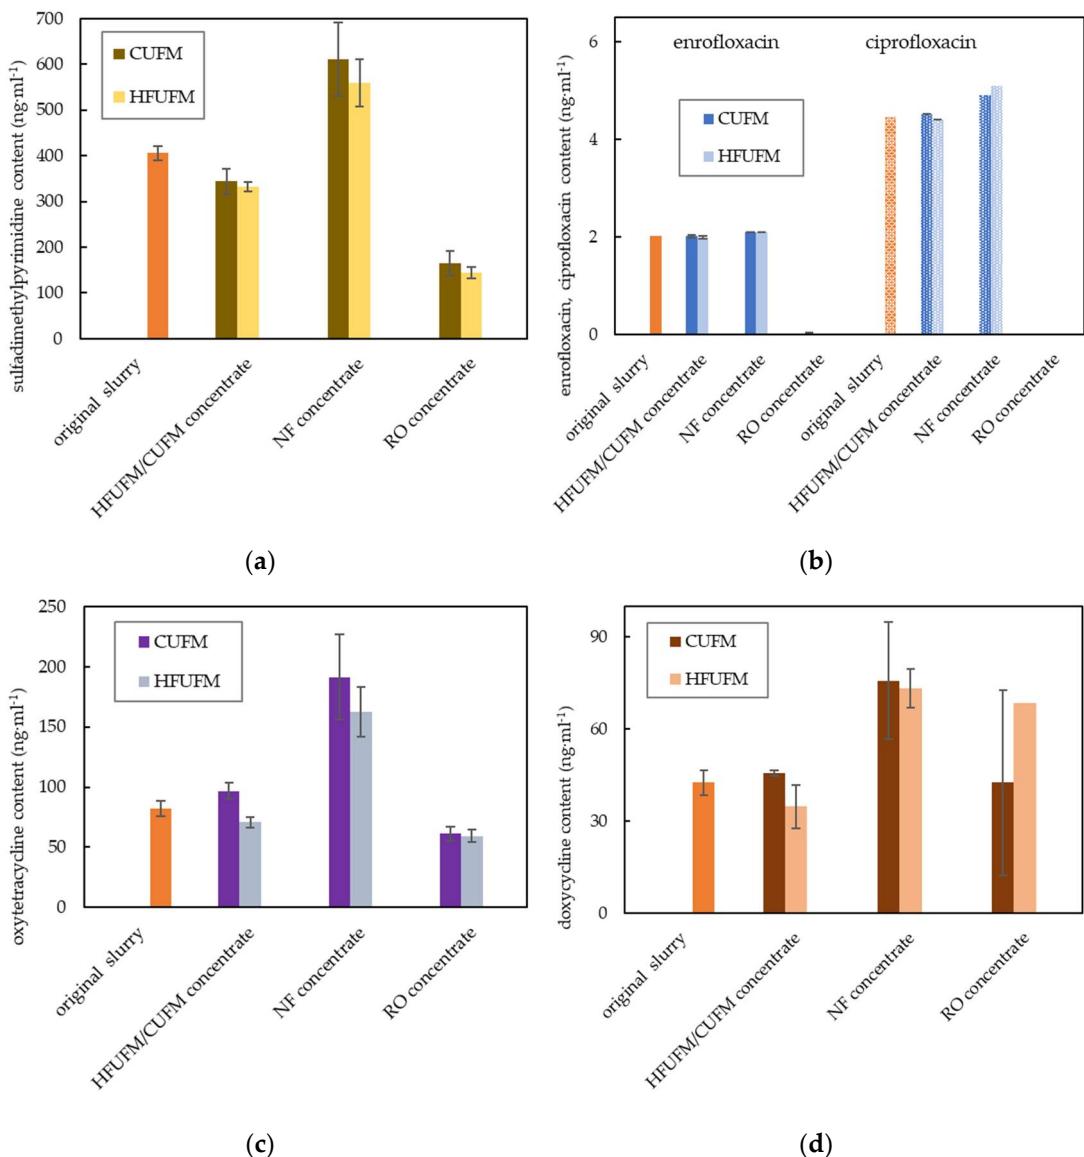

Figure S3. The content of (a) sulfadimethylpyrimidine, (b) enrofloxacin and ciprofloxacin, (c) oxytetracycline, (d) doxycycline in the concentrates of the integrated process with HFUFM and CUFM pretreatment.
