## Correlations

		Permeability	Retardance
Permeability	Pearson Correlation	1	-.836**
	Sig. (2-tailed)		.001
	N	12	12
Retardance	Pearson Correlation	-.836**	1
	Sig. (2-tailed)	.001	
	N	12	12

\*\* . Correlation is significant at the 0.01 level (2-tailed).

**Figure S1.** Correlation plot and test between the semi-permeability and optical retardance of electrofabricated chitosan membranes.
