

The Study Questionnaire

This survey investigates the dynamics of women's sexual desire, and is designed for both heterosexual men and women over the age of 18 and who are currently in a relationship that has lasted for at least three months. The survey is anonymous; you cannot be identified from your answers. The results will be used solely for academic research. The survey takes about 10 minutes. By filling in the survey, you have shown your agreement to participate in this project. Thank you for your honest and insightful answers.
