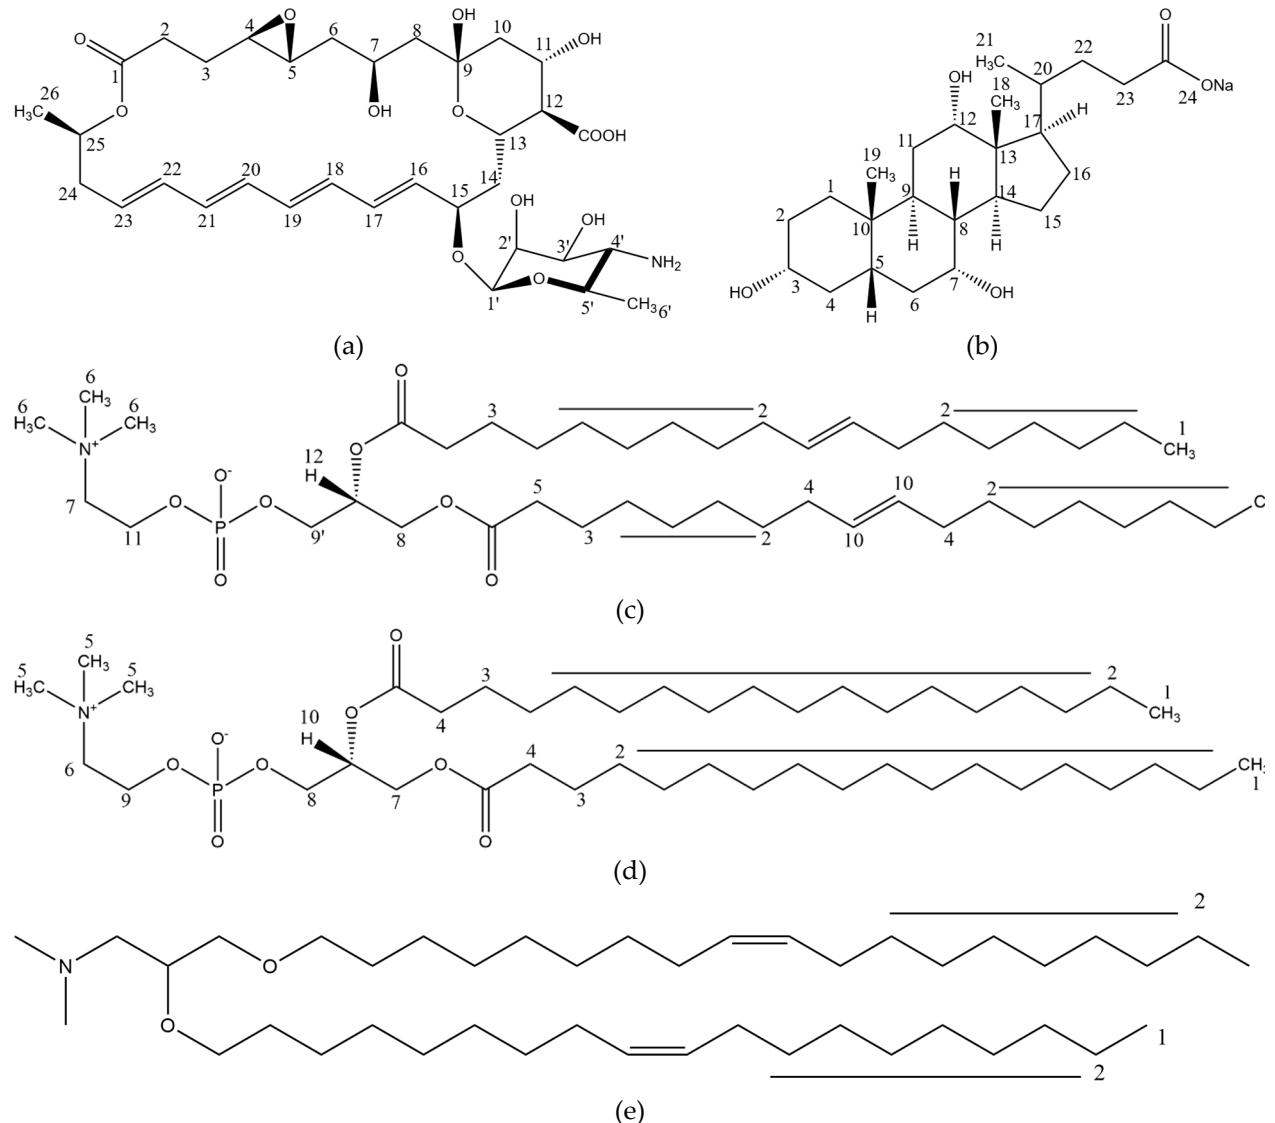

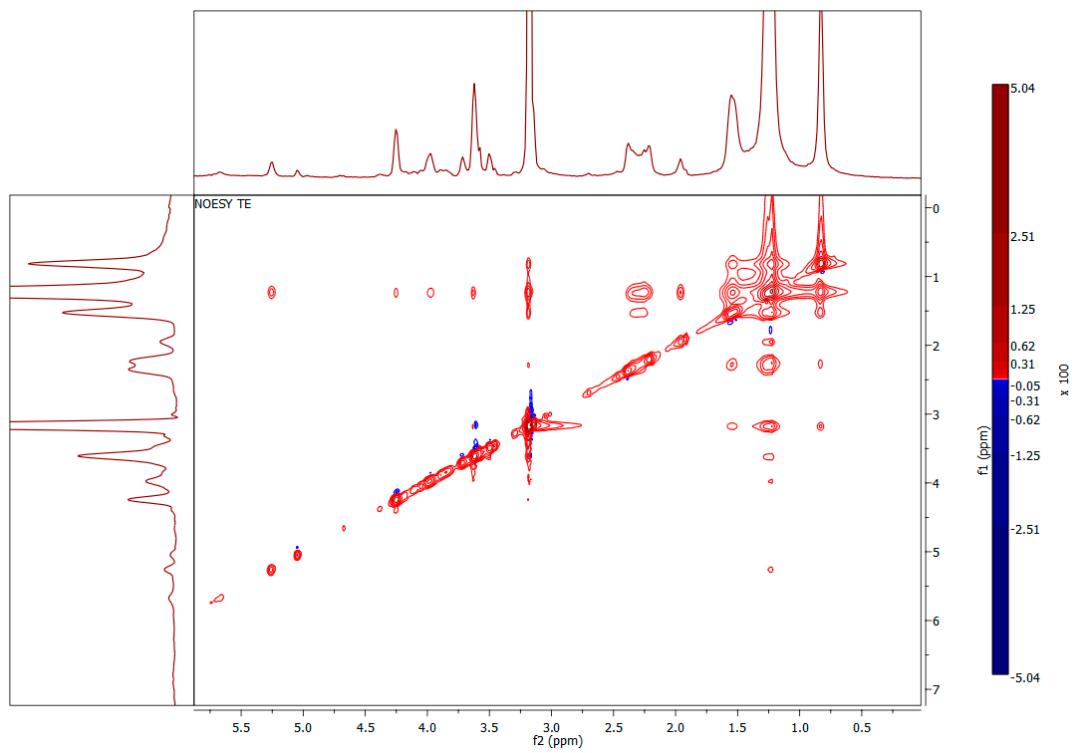

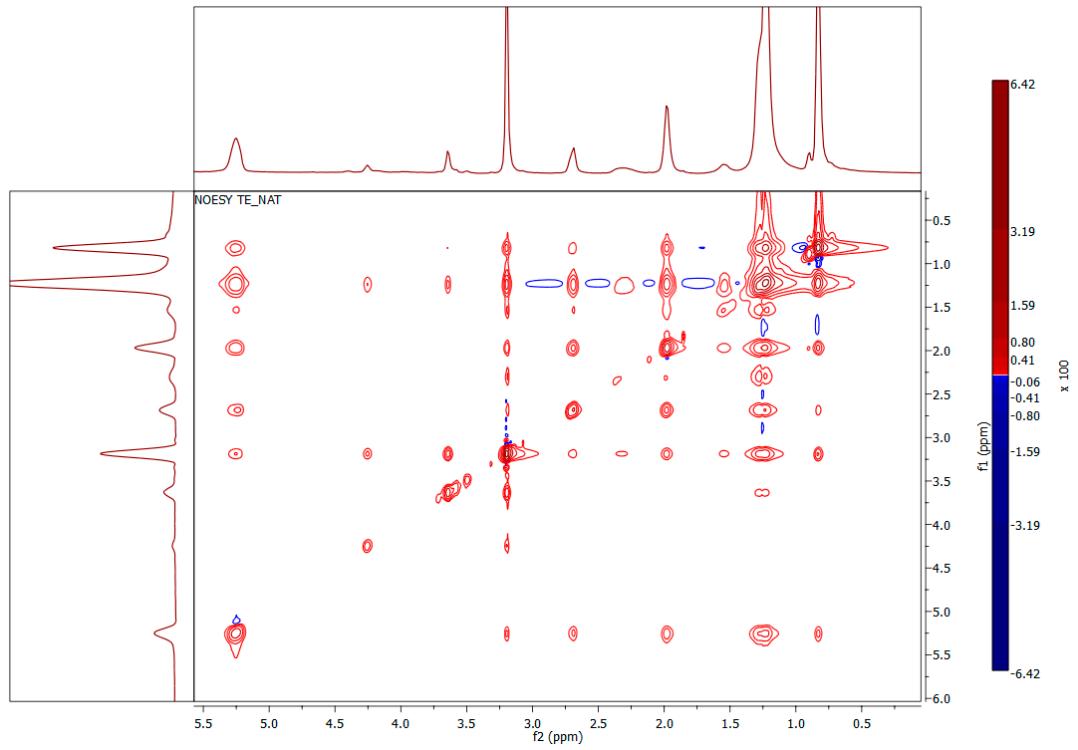

Figure S1: Structures of Natamycin (a), Sodium Cholate (b), Soy PC (c), DSPC (d), and DODMA (e) with respective numeration used in NMR peak assignments

(a)

(b)

Figure S2: NOESY spectra of transtethosomes (a) and Natamycin-loaded transtethosomes (b).

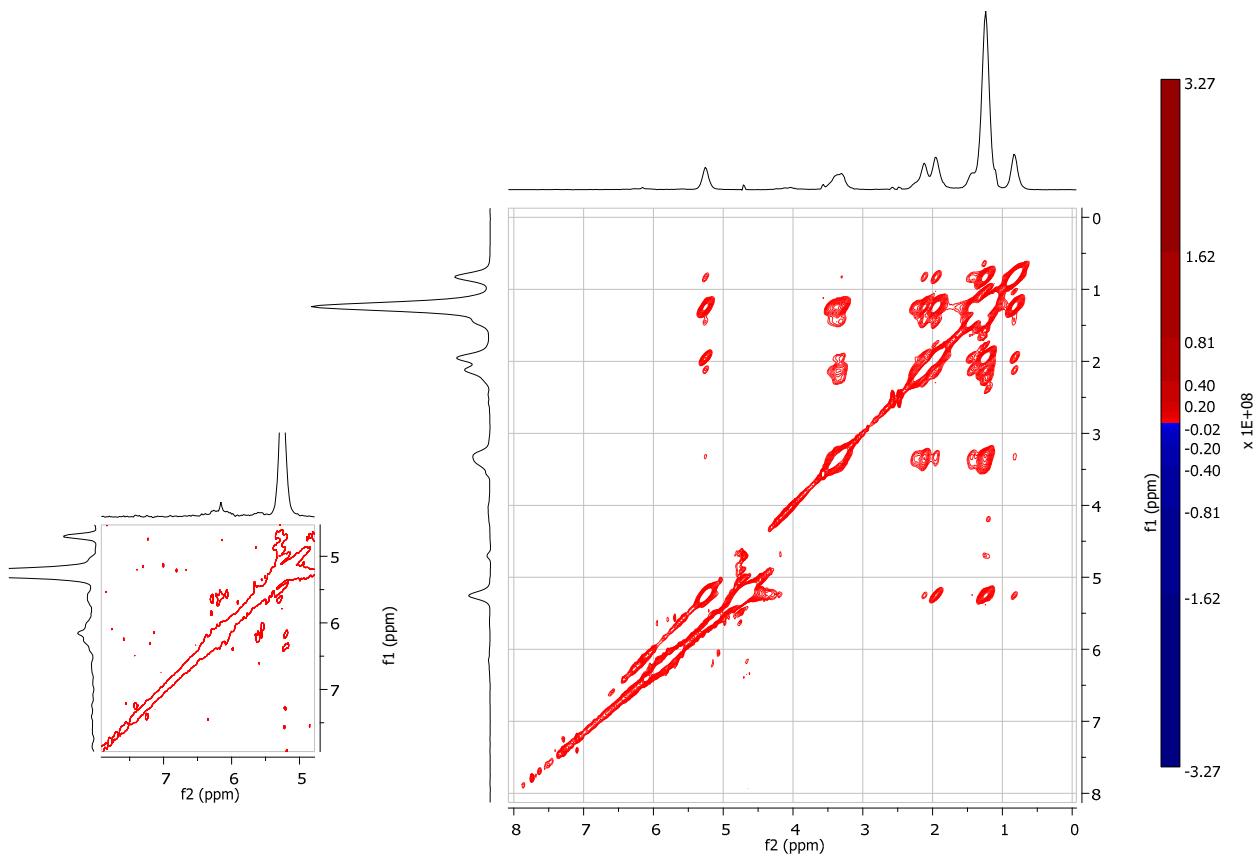

Figure S3: NOESY spectra of representative NAT-loaded LNP (right) with enlargement (left) of aromatic signals range.
