

## Supplementary Materials

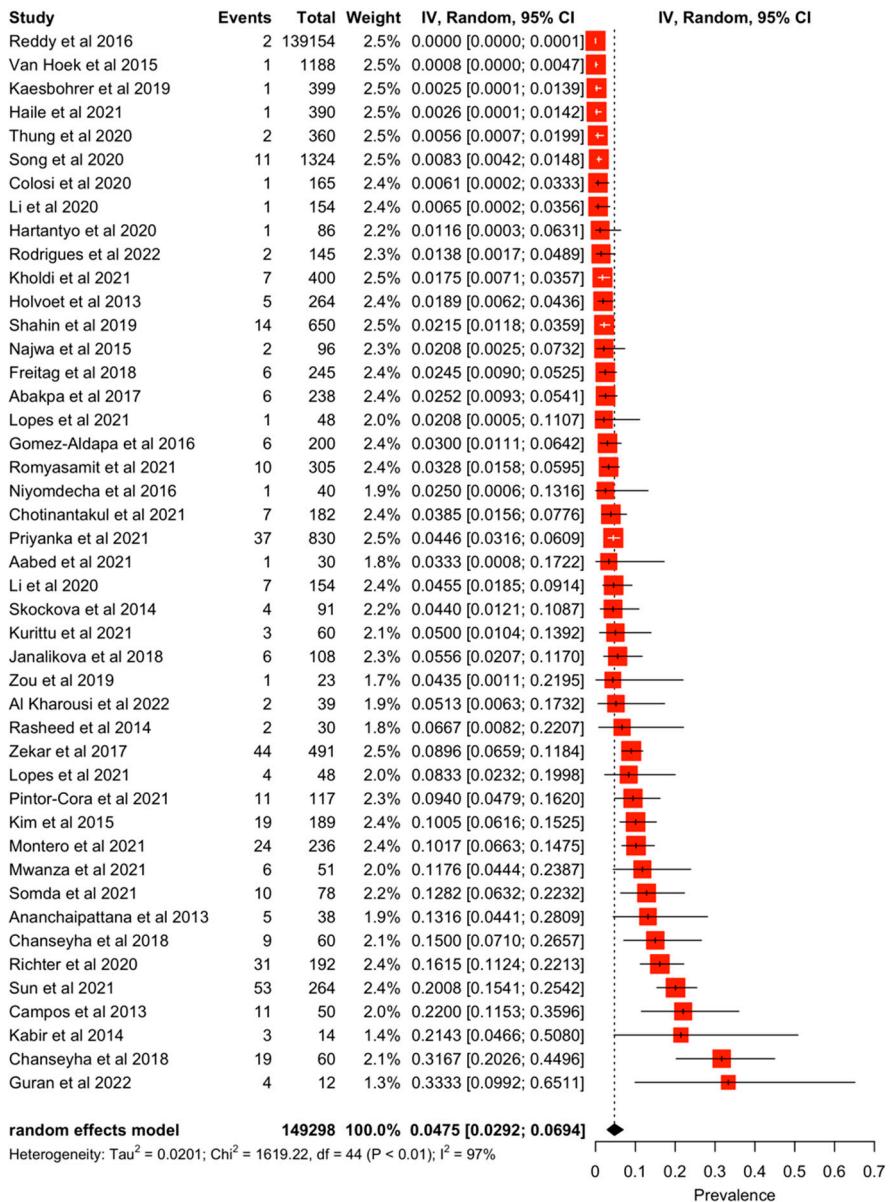

Figure S1: Forest Plot of Citations with Tetracycline and Third-Generation Cephalosporin Resistant Prevalence Estimates. The column titled 'Events' are the number of plant-food samples that were reported resistant to tetracycline and/or third-generation cephalosporin antimicrobials. The column titled 'Total' are the number of plant-food samples selected for antimicrobial susceptibility testing.

Table S1: Table of Included Citations.

Study	Country	Sample	Stage	Microbe name	Sample weight (g)	Interpretive Criteria	AMR	Resistant Samples	Total Samples	Prevalence (%)
