

Table S1 Phytopathogenic microbes used in this study.

Table S2 Transcript levels of genes induced ( $\log_2$  fold change  $> 1$ , p-value adjusted  $< 0.05$ ) in Arabidopsis plants inoculated with OSUB18 compared to water control. An Excel file was submitted separately. The  $\log_2$  fold change values were labeled with gradient colors in the excel sheet.

Table S3 Transcript levels of genes repressed ( $\log_2$  fold change  $> 1$ , p-value adjusted  $< 0.05$ ) in Arabidopsis plants inoculated with OSUB18 compared to water control. An Excel file was submitted separately. The  $\log_2$  fold change values were labeled with gradient colors in the excel sheet.
