

## Supplementary Figure

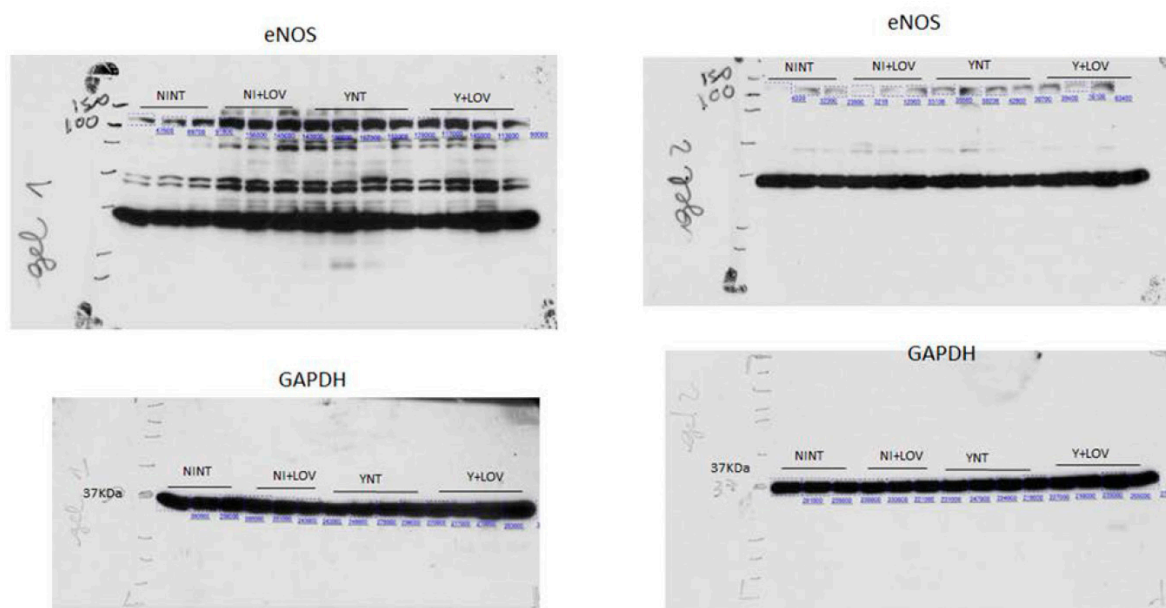

**Figure S1.** represents original western blot images for ICAM-1 and MCP-1, using samples from experiment 1, performed in the same membrane, with their loading control GAPDH.

**Figure S2.** represents original western blot images for ICAM-1 and MCP-1, using samples from experiment 2, performed in the same membrane, with their loading control GAPDH.

**Figure S3.** represents original western blot images for VCAM-1, using samples from experiment 1 and 2, with their loading control GAPDH.

**Figure S4.** represents original western blot images for eNOS, using samples from experiment 1 and 2, with their loading control GAPDH.
