Figure S1. Mass spectra and chemical structure of α -tocopherol (a) and β -sitosterol (b).

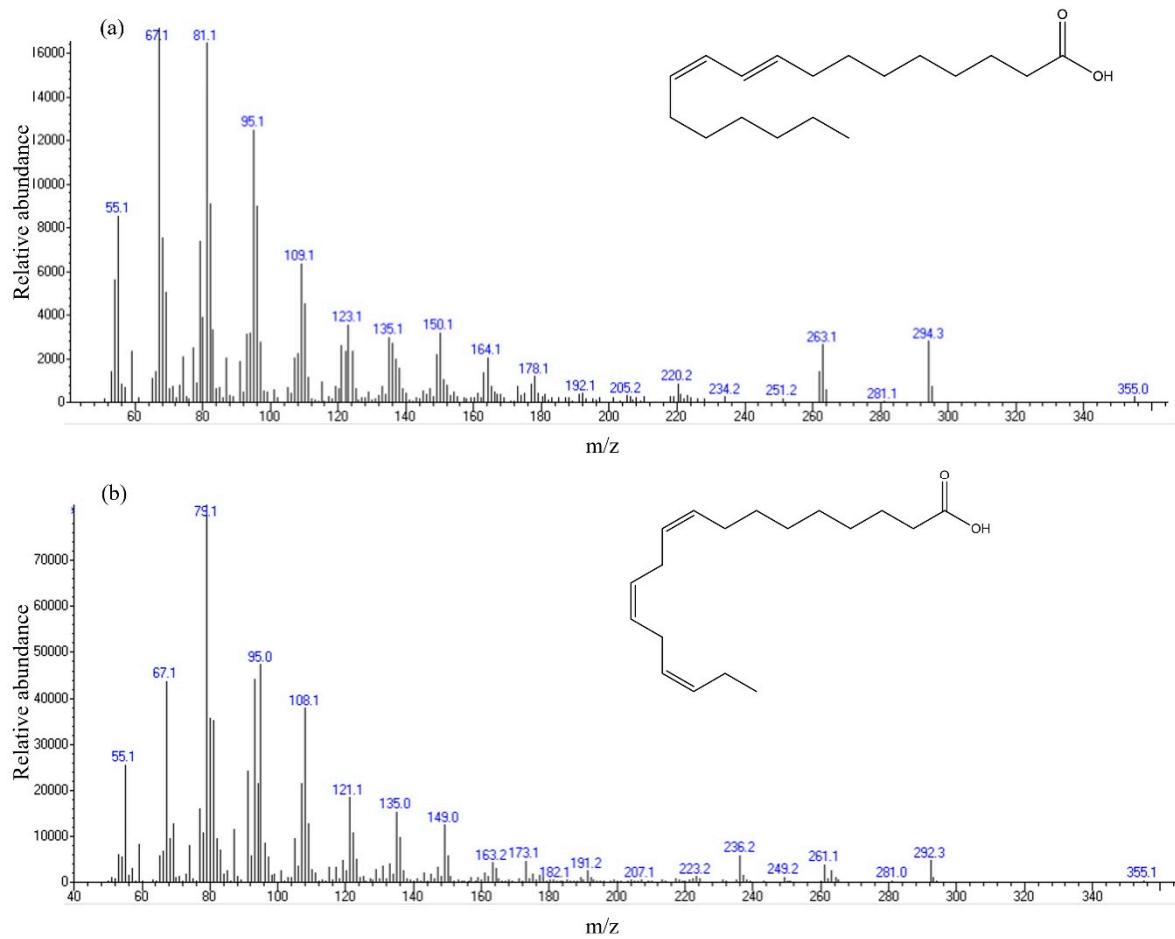

Figure S2. Mass spectra and chemical structure of linoleic acid (a) and linolenic acid (b).

Table S1. Detailed quantified profile of the methanolic extracts obtained from *A. chilensis* leaves ($\mu\text{g g}^{-1}$ DW). Different letters in the same row indicate significant differences according to Tukey's test ($p \leq 0.05$).
