

Figure S.1. UO126 dose response experiment.

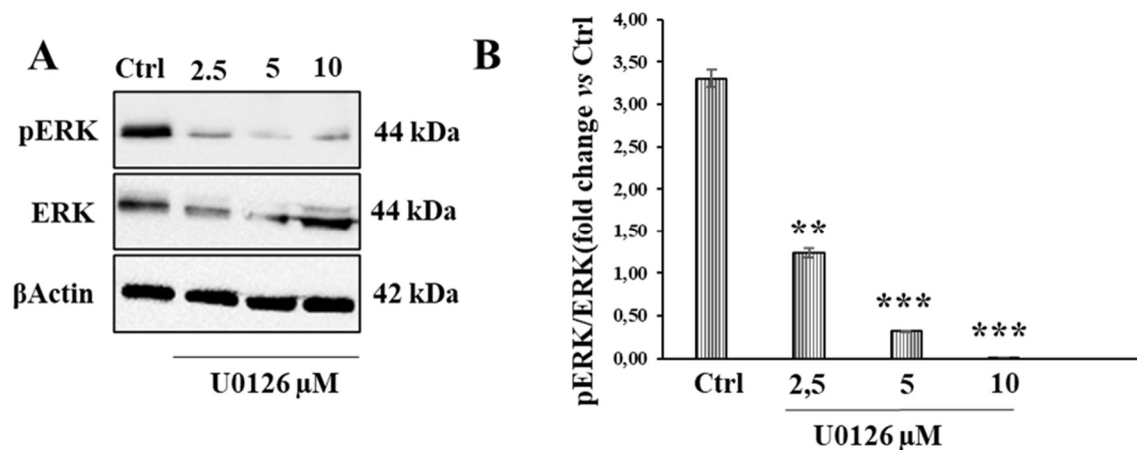

Figure S.1. (A) Western Blot analyses of phospho- and total ERK1/2 performed on cells cultured in basal condition and 30 minutes after UO126 administration UO126 (2.5, 5, 10 μ M). (B) Graphical representation of densitometric analyses of the bands (2.5 μ M) ** *vs* CTRL $p \leq 0.01$. (5,10 μ M) *** *vs* CTRL $p \leq 0.001$. Results were expressed in fold change, with the control considered as 1 (\pm standard error of the mean (S.E.M)).
