Table List

Table S1: Heavy metals concentration of sludge samples and relevant Chinese legal standards

Table S2: The recovery of the sum of four fractions ratio the total HMs concentration

Table S3: The levels of each variable and corresponding heavy metals removal from BC400 obtained from the Box–Behnken design

Table S4: ANOVA for Response Surface Quadratic Model

Table S5: The leaching concentration of heavy metals in sludge and biochars

Table S1. Heavy metals concentration of sludge samples and relevant Chinese legal standards.

Heavy metal	Average concentration in sludge (mg/kg)	Standards					
		Quality of sludge used in gardens or parks		Quality of sludge used in land improvement		Control standards for agricultural use	
		pH<6.5	pH>6.5	pH<6.5	pH>6.5	Level A	Level B
Cu	7945.24±30.54	800	1500	800	1500	500	1500
Zn	4794.85±17.32	2000	4000	2000	4000	1500	3000
Cr	8195.13±10.36	600	1000	600	1000	500	1000
Ni	1341.51±4.43	100	200	100	200	100	200
As	24.56±3.64	75	75	75	75	30	75
Pb	29.47±1.03	300	1000	300	1000	300	1000
Cd	1.23±0.06	5	20	5	20	3	15

Table S2. The recovery of the sum of four fractions ratio the total heavy metals concentration.

Sample		Cr concentration of fractions [mg/kg]				Sum [mg/kg]	Total concentration [mg/kg]	Recovery [%]
