Table S2. Explanatory file for Effective Public Health Practice Project (EPHPP) Quality Assessment tool.

Component ratings	Details
A. Selection bias	Good: (Q1 is 1) and (Q2 is 1).
	Moderate: (Q1 is 1 or 2) and (Q2 is 2).
	Poor: (Q1 is 3); or (Q2 is 3).

Q1. Are the individuals selected to participate in the study likely to be representative of the target population?

1 Very likely	Randomly selected from a comprehensive list of individuals in the target population.
2 Somewhat likely	Referred from a source (e.g., clinic) in a systematic manner.
3 Not likely	Self-referred.

Q2. What percentage of selected individuals agreed to participate?

1 80 - 100% agreement	Refers to the percentage of subjects in the control and intervention
2 60 – 79% agreement	groups that agreed to participate in the study before they were
3 Less than 60% agreement	assigned to intervention or control groups.
4 Not applicable	

B. Study design	Good: (Q1 is 1).
	Moderate: (Q1 is 2).
	Weak: (Q1 is 3).

Q1. Indicate the study design

1 Strong design	Randomized controlled trials (RCTs) and controlled clinical trials (CCTs).
2 Moderate design	Cohort or case-crossover designs.
3 Weak design	Cross-sectional or time-series designs.

C. Confounders	Good: (Q1 is 2) or (Q2 is 1).
	Moderate: (Q1 is 1) and (Q2 is 2).
	Poor: (Q1 is 1) and (Q2 is 3).

Q1. Were there important differences between groups prior to the intervention?

1 Yes	Important differences were found.
2 No	No important differences were found.

Q2. If yes, indicate the percentage of relevant confounders that were controlled (either in the design (e.g., stratification, matching) or analysis).

1 80-100%	Cross-sectional and cohort: meteorological variables and demographic characteristics.
	Case-crossover and time-series: meteorological variables and time-effects.
2 60-79%	Cross-sectional and cohort: meteorological variables or demographic characteristics.
	Case-crossover and time-series: meteorological variables or time-effects.
3 Less than 60% or none	Not controlled.

D. Blinding	Good: (Q1 is 2) and (Q2 is 2).
	Moderate: (Q1 is 2) or (Q2 is 2).

	Poor: (Q1 is 1) and (Q2 is 1).

Q1. Was (were) the outcome assessor(s) aware of the intervention or exposure status of participants?

1 Yes	The outcome assessors were aware of the exposure status of participants.
2 No	The outcome assessors were not aware of the exposure status of participants.

Q2. Were the study participants aware of the research question?

1 Yes	The participants were aware of the exposure status of participants.
2 No	The participants were not aware of the exposure status of participants.

E. Data collection methods	Good: (Q1 is 1) and (Q2 is 1). Moderate: (Q1 is 1) and (Q2 is 2). Poor: (Q1 is 2).

Q1. Were data collection tools shown to be valid?

1 Yes	The blood sample was detected by professionals and trained investigators.
2 No	The method for blood sample assay was not introduced.

Q2. Were data collection tools shown to be reliable?

1 Yes	Methods had been acknowledged or with evidence from previous researches.
2 No	Methods were not clearly addressed.

F. Withdrawals and drop-outs	Good: (Q1 is 1) and (Q2 is 1). Moderate: (Q2 is 2). Poor: (Q2 is 3) or (Q1 is 2). Not Applicable: (Q1 is 3) or (Q2 is 4).

Q1. Were withdrawals and drop-outs reported in terms of numbers and/or reasons per group?

1 Yes	Describe both the numbers and reasons for withdrawals and drop-outs.
2 No	Either the numbers or reasons for withdrawals and drop-outs are not reported.
3 Not Applicable	No follow-up data.

Q2. Indicate the percentage of participants completing the study. (If the percentage differs by groups, record the lowest).

1 80 -100% 2 60 - 79% 3 Less than 60% 4 Not Applicable	The percentage of participants completing the study refers to the % of subjects remaining in the study at the fi—l data collection period in all groups (i.e., control and intervention groups).

Overall ratings: 1) High—no "Poor" ratings. **2) Moderate**—one "Poor" rating. **3) Poor**—two or more "Poor" ratings.

Table S3. Quality assessment using the Effective Public Health Practice Project (EPHPP) Quality Assessment tool for the included studies.
