

Supplemental Figure S1. Comparison of total bilateral intrapulmonary shunting among patients at different stages of single ventricle circulation. Graph demonstrates a box-and-whisker plot with median and interquartile ranges (box), as well as 5th-95th percentiles (whiskers) and single points outside the 5th-95th percentiles. Analyzed using Kruskal Wallis test with Dwass, Steel, Critchlow-Fligner method for multiple comparison adjustment.
