The author has made the following corrections to his paper [1], which has been republished in order to comply with the rules of the International Code of Zoological Nomenclature (I.C.Z.N.).

A new section has been added as follows:

4.4. Taxon Validation

The new taxon *Allotrisopterus* was registered in ZooBank in 2017 (urn:lsid:zoobank.org:pub:**CC10E466-C8FD-46FE-9F8D-**24F03702AF1A).

The year of publication for the new genus *Allotrisopterus* is therefore not 2016, but 2017, which has been reflected in the date of publication.

Furthermore, the colors of the otoliths in Figure 8 were too orange-like and in the republication they more accurately reflect the original colors. Figures 4–6 were too small and have been enlarged in the republication. Figure 11 was too large and has been reduced in size in the republication.

The author apologizes for any inconvenience caused to the readers. The change does not affect the scientific results.
