Error in Table

In the original publication [1], an error appears in Table 3 in the original article, in which the number 75 incorrectly appeared in the left hand column instead of the correct number 90. The corrected Table 3 appears below. The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. The original publication has also been updated.

Table 3. How 4 ORS 90 packets could be dissolved in 3 L of water to make a solution more suitable for replacing cholera patients' electrolyte losses. Using ORS 75 packets with 2.6 g NaCl each, a similar solution could be prepared by dissolving four packets in 2.5 L of water.

ORS Suitable for Cholera Patients	
Dissolve 4 Packets of 90 ORS in 3 L Water	Resulting ORS Concentrations
	Na ⁺ 120 *
	K ⁺ 27 *
	Cl ⁻ 107 *
	Citrate 13@
	Glucose 147@

* mEq/L, @ mMol/L.
