Footnotes: DM = diabetes mellitus; HCW = health care workers; <sup>\*</sup>p value from multivariable regression analysis (modified Poisson model). Variables which had *p* value < 0.2 in the unadjusted analysis were included in the multivariable model. <sup>†</sup> Good glycemic control: fasting blood glucose of 80–130 mg/dL or Postprandial blood glucose < 180 mg/dL; Poor glycemic control: fasting blood glucose of > 130 mg/dL or Postprandial blood glucose > 180 mg/dL; <sup>‡</sup>29 missing values.
