**Supplementary Figure S1**. Comparison of CTC and cfDNA CNAs for four additional patients. (**a**)-(**d**) Whole-genome copy number profiles for CTCs and cfDNA from the same blood tube for patients 10, 14, 29, and 5. As in Figure 5, heatmap rows depict profiles for individual CTCs (patient 10: n=5, patient 14: n=3, patient 29: n=2, patient 5: n=7) or cfDNA and are colored by the ratio to the genome-wide mean according to the scale shown in (a). An overlay of the cfDNA (black) and single or averaged CTC (green) profiles are also shown below each heatmap, along with chromosome numbers.

Supplementary Figure S2. LBx dynamics for 11 patients with three consecutive study draws. (Top to bottom, left to right) Patients 2, 7, 11, 14, 15, 19, 20, 21, 24, 25, 27. LBx timepoints correspond to the first day of two cycles of therapy, plus the start of the next line of therapy. Disease status prior to the change in therapy is shown. (PD, progressive disease; SD, stable disease)

Supplementary Table 1

Gene	Alteration(s)	Cancer types	Drugs (for therapeutic implications only)
BRAF	V600E	All Solid Tumors (excluding Colorectal Cancer)	Dabrafenib + Trametinib
ERBB2	Amplification	Breast Cancer	Ado-Trastuzumab Emtansine
ERBB2	Amplification	Breast Cancer	Lapatinib + Capecitabine, Lapatinib + Letrozole
ERBB2	Amplification	Breast Cancer	Margetuximab + Chemotherapy
ERBB2	Amplification	Breast Cancer	Neratinib, Neratinib + Capecitabine
ERBB2	Amplification	Breast Cancer	Trastuzumab + Pertuzumab + Chemotherapy
ERBB2	Amplification	Breast Cancer	Trastuzumab + Tucatinib + Capecitabine
ERBB2	Amplification	Breast Cancer	Trastuzumab Deruxtecan
ERBB2	Amplification	Breast Cancer	Trastuzumab, Trastuzumab + Chemotherapy
ESR1	D538, E380, L469V, L536, S463P, Y537	Breast Cancer	Elacestrant
NTRK1	Fusions	All Solid Tumors	Entrectinib
NTRK1	Fusions	All Solid Tumors	Larotrectinib
NTRK2	Fusions	All Solid Tumors	Entrectinib
NTRK2	Fusions	All Solid Tumors	Larotrectinib
NTRK3	Fusions	All Solid Tumors	Entrectinib
NTRK3	Fusions	All Solid Tumors	Larotrectinib
Other Biomarkers	Microsatellite Instability-High	All Solid Tumors	Pembrolizumab
Other Biomarkers	Tumor Mutational Burden-High	All Solid Tumors	Pembrolizumab
PIK3CA	C420R, E542K, E545A, E545D, E545G, E545K, H1047L, H1047R, H1047Y, Q546E, Q546R	Breast Cancer	Alpelisib + Fulvestrant
PIK3CA	Oncogenic Mutations (excluding C420R, E542K, E545A, E545D, E545G, E545K, Q546E, Q546R, H1047L, H1047R and H1047Y)	Breast Cancer	Alpelisib + Fulvestrant
RET	Fusions	All Solid Tumors (excluding Thyroid Cancer, NSCLC)	Selpercatinib
NTRK1	G595R	All Solid Tumors	Larotrectinib
NTRK3	F617L	All Solid Tumors	Larotrectinib
NTRK3	G623R	All Solid Tumors	Larotrectinib
NTRK3	G696A	All Solid Tumors	Larotrectinib
