### Message from the Guest Editors

Dear Colleagues,

Extant literature has pointed toward different entrepreneurship determinants, identifying individual characteristics which may enhance entrepreneurial initiatives. These may be related to contextual, cultural, institutional, social, regional, and economic aspects of a given geography; or individual characteristics such as age, gender, and risk aversion, considering self-perception of ability, self-efficacy, resilience, independence, self-confidence, and support from friends and family in the opportunity identification.

Since context plays a role, cross-national benchmarking can be used for assessing policy effectiveness, considering circumstances and constraints...

Prof. Dr. João Leitão
