Deadline for manuscript  
submissions:

**closed (25 July 2024)**

### Message from the Guest Editor

Food security involves ensuring that there is enough affordable food available for everyone to maintain their health. Environmental security involves ensuring the safety of the environment in which people live in the context of sustainable development. In the whole world, particularly in developing countries like China, extensive agricultural practices have been harmful to both food and environmental security.

Thus, scientific and effective agricultural strategies are highly crucial for ensuring food and environmental security. In terms of a single country, agricultural strategies for food and environmental security could be analyzed with a focus on the issues of food policy, agricultural technology, and the application of new-type agricultural technologies (e.g., biotechnology, digital technology). From an international perspective, attention should be paid to the cooperation that promotes synergistic progress in international agricultural development and environmental conservation.

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
