submissions:

closed (30 April 2024)

Message from the Guest Editors

The section of the Agriculture journal “Crop Protection, Diseases, Pests, and Weeds” has strived toward high-quality published papers. I thank all who have contributed to results thus far. The constant challenges of climate change, pesticide resistance evolution, and the need to reduce pesticide use, encourage us to continue this path. As part of integrated pest management, particular attention has been paid to studies of innovative control strategies in sustainable agriculture.

This Special Issue collects advanced studies in crop protection, pest management, pathogen identification, biological control, safe pesticide development, plant-microbe interactions, and more.

In this Special Issue, multi-, inter- and transdisciplinary original papers and reviews will be collected. Contributions to this Special Issue are only accepted from the editorial board and scientists invited by the editorial board.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
