Message from the Guest Editors

Agricultural products are highly nutritious and provide significant benefits for human health. They are also highly perishable and are thus easily susceptible to spoilage, leading to reduced quality attributes and consequent food loss. Over the years, cold chain technologies have been employed to reduce the quality loss of fruits and vegetables from farm to fork. However, many losses still occur during the packaging, pre-cooling, transportation, and storage of these fresh agricultural products. Due to growing concerns about food safety and environmental issues, a major goal for the postharvest handling of agricultural products should emphasise both the effective preservation of the quality attributes, and the use of appropriate technologies that are considered safe with low, or no, adverse environmental impacts.

This Special Issue aims to cover the recent advances in the maintenance of agricultural product quality. We highly encourage papers that focus on new sustainable production practices, the innovative use of technology, quality evaluation, sustainability, consumer attitude, and creative product development in all steps of the production and distribution chain.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
