

## **Current and Future Application of Computer Vision and Data Analysis in Smart Agriculture and Agroforestry**

Guest Editors:

**Dr. Salviano Pinto Soares**

**Dr. Antonio Valente**

**Dr. Filipe Cabral Pinto**

Deadline for manuscript  
submissions:

**closed (10 April 2024)**

### **Message from the Guest Editors**

The use of technology is an increasingly in-demand requirement for many of the primary economic activities such as agriculture, mining or forestry. Factors such as population growth, climate change or the shifting of business models due to the recent changes across the world have added additional pressure to these industries to improve productivity while maintaining sustainability. Digital agriculture broadly encompasses technologies used to assist producers in farming, most commonly known as precision agriculture technologies, that need to be empowered with data analysis and machine learning facilities. On the other hand, forestry nowadays is an industry that presents an ample opportunity for automation and the use of robotic vehicles and computer vision to perform specific tasks, and despite the large body of development and research into robotics in terms of perception, navigation and control being vast, their practical application in this industry is still limited.

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
