Message from the Guest Editor

Dear Colleagues,

This Special Issue intends to cover the state-of-the-art and recent progress in different aspects related to the use of plant-associated microbes to increase the sustainability and resilience of crops in a wide range of cropping systems (grassland, horticultural crops, fruit trees) and in a scenario of environmental challenges due to climate change. All types of manuscripts (original research and reviews) providing new insights on the cellular and molecular aspects of plant-microbe interactions and on the application and benefits of the use of microbial inoculants in agriculture are welcome.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
